Stack version

FLEXOprint 1-6 colors
FLEXOprint for stretch film
FLEXOprint stack system
FLEXOprint drum system
FLEXOprint inline system
width up to 1.200mm

**useable for
film or paper**

FLEXOprint system - also for "stretch film"

Print on stretch film ?!

No problem, we also have the solution to print on stretch film.
Give your customers value added through increased attention and at the same time protection of the goods and the danger of theft.

Print security features, logos, and more on your stretch film.

Logisticians, supermarkets and more can protect their wrapped goods from theft. Simply cut film, remove goods and repackage is difficult. The original printed stretch film is missing ...

So there are countless other applications where your customers can get added value through printing.
