Active Corporate Wear

MADE WITH SPORTS DNA.

We make people move at gyms, tracks and courts. On slopes and forest trails. And in workplaces all over the world. Our Active Corporate Wear collection is inspired by everything we've learned from making functional garments for the world's greatest athletes. Bringing fit, durability and breathability to the modern workplace, our clothes are designed to make the most out of office hours and beyond. Inspiring co-workers to take the stairs more often, schedule more meetings outside and make exercise a part of the daily routine. Studies show that active workplaces enjoy higher productivity, happier employees and fewer sick days. So don't be surprised if the next quarterly report goes one step further.

Outdoor

Our Outdoor range allows you to experience everyday adventures with great confidence. This comprehensive collection includes items that protect against the elements, offering excellent comfort during casual excursions.

This warm and functional jacket features lightweight and blown-in polyester insulation that provides remarkable warmth, effectively trapping body heat to keep you warm and cozy in chilly conditions. The polyester filling is highly functional and quick drying, minimizing discomfort from sweat or unexpected rain. Its lightweight nature also means it can be compressed into a small pouch or backpack, allowing for quick on-the-go adjustment to rapid temperature drops. The jacket also features detachable hood, chest zip pocket, and two side zip pockets for secure storage of essentials such as key, phone, and energy bar. Whether you're exploring the backcountry or simply navigating your daily routine, this jacket is a reliable choice for staying warm and protected in various outdoor environments. Highly versatile, it works perfectly for layering in cold conditions or as a standalone garment on milder days.

ADV Explore Power Fleece Hood Jkt ADV

MEN	1915240	S-4XL
WOMEN	1915241	XS-3XL

ADV Explore Power fleece Hood Jacket is a stretchy and highly functional fleece jacket that makes a versatile and essential addition to any outdoor enthusiast's wardrobe. This advanced hood jacket is made of a stretchy fleece material with exceptional warmth retention and breathability properties.

The fleece material traps heat close to the body while allowing moisture and sweat to escape, ensuring you stay warm, dry and comfortable during outdoor activities in cold conditions. In addition, the stretchy material provides excellent freedom of movement. Whether you're hiking, skiing, or engaging in any outdoor activity, the jacket moves with you, ensuring you can easily bend, twist, and reach without any restriction. The jacket also features two zip pockets that provide convenient storage for essentials like keys, phone and snacks. A perfect choice for a wide range of activities – from hiking and skiing to everyday wear during chilly seasons – the jacket can be worn both as a mid-layer and an outer layer.

Material: 94% Polyester-Recycled, 6% Elastane

A man in athletic wear is sitting on a windowsill, looking out at a forest landscape. The scene is lit with warm, golden light, suggesting sunrise or sunset. The man is wearing a dark t-shirt, shorts, and a watch. He is sitting on a wooden windowsill with a textured rug underneath. The floor is made of light-colored wood. The background shows a dense forest of trees under a cloudy sky.

Pacer

ADV

MEN	1915025	EU 39 ½-47, UK6-UK12
WOMEN	1915026	EU 35 ½-42, UK3-UK8

Introducing the Pacer, our most comfortable performance running shoe that provides exceptional bounce and stability for a smooth and speedy ride.

An advanced performance running shoe that features a softer version of the successful Px Foam™ in the midsole, Pacer delivers a stable, smooth, and responsive ride with explosive rebound – perfect for speed training and every day running. Its lightweight construction provides a bouncy, energetic experience that propels you forward with each stride, while its minimal outsole design with hexagon lug pattern offers superior road traction for a secure grip on various surfaces. In addition, the upper is made from a lightweight and breathable material that provides a snug and stable fit. A sleek design and lightweight feel make the Pacer an ideal choice for runners seeking a fast, nimble shoe that won't weigh you down.

Px Foam™

Px Foam™ is an ultra-lightweight midsole material that offers an exceptionally high amount of energy return while providing shock-resistance and flexibility. A single, natural foaming agent is used in making this innovation without adding any chemical cross-linking agents. In addition, raw and finished materials are completely reusable. The innovative foam has an extremely low density making it up to 20% lighter than traditional EVA. The reduced weight combined with explosive rebound make Px Foam™ perfect for every run.

Material: Upper: 39% Polyester, 39% Polyester-Recycled, 10% Thermoplastic urethanes, 12% Polyurethane. Midsole: 100% ETPU Foam. Outsole: 100% Rubber

ONE-PIECE ENGINEERED MESH UPPER, MADE FROM 50% RECYCLED MATERIALS

V150 Engineered

CORE

MEN	1908265	EU 39½-50½, UK 6-15
WOMEN	1908264	EU 35½-42, UK 3-8

Mid-distance road-running shoe that offers excellent flex and support, which makes it a great choice also for speed intervals and longer runs.

Designed for the 10k run, V150 Engineered comes with a fully engineered mesh upper for optimal freedom of movement, comfort and performance. V Energy Foam in the midsole's forefoot area provides high-caliber energy return, elevating your stride and giving that extra push to help you reach your goals. The shoe is built on a last design that follows the natural contours of the foot and comes with flexibility in the right areas to allow the foot muscles to work and perform as they are intended to. Furthermore, V150 Engineered features neutral stability to offer the right level of motion control for runners with normal pronation or a neutral foot movement.

Material: Upper Mesh: 60% Polyester 40%Polyamid;
Insole: EVA with single mesh; Lining: 100% Polyester;
Outsole: 100% Rubber; Midsole:100% EVA; Insole: EVA with single mesh

Baselayer

Craft is a pioneer in performance baselayer and offers functional garments that provide excellent body-temperature management during exercise in any condition. The fabric structures and knitting techniques interact to efficiently transport moisture away from the skin and distribute it on the outside – enabling you to perform optimally.

Dry

Warm

Wool

Underwear

CRAFT 

SEGMENTS

Craft Temperature Control System

<p>In what temperature will you exercise?</p> <p>-30° -10° 0° 10° 30°</p>	<p>At which activity level will you exercise?</p> <p>Easy to light Medium to hard Hard to intense</p>
---	---

Match your temperature with your activity level to find the right king of baselayer.

Dry is our super-efficient baselayers made from synthetic fibers that help you stay dry during intense workouts in warmer temperatures. Contrary to popular belief, a baselayer is always a good idea, even if the thermometer is showing red.

This is what you want if you plan on working out when it's cold. These baselayers are made of the best of best when it comes to synthetic fibers, keeping you both warm and dry, no matter if you're going for a new PB or just taking a walk in the park.

Wool. You either love it or hate it. This baselayer collection is based on natural fibers and keeps you warm in really cold conditions, even when wet. The garments are super versatile and work just as well for high-intensity training, especially since the material has odor-resistant qualities!

Some products really stands the test of time. And through the years they have become true classics that you will always find in our range.

CRAFT CIRCLE

RUNNING IN CIRCLES IS THE ONLY WAY FORWARD.

Circle is our sustainability initiative. It is an integral thread that runs through everything we do, from design to delivery and beyond. Its purpose is simple: To encourage conscious choices that minimize the environmental impact of our products.

Our sustainability initiative is connected to six of the Global Goals in United Nation's agenda 2030, chosen for their relevance to our business and our chance to contribute toward them. These six goals guide how we design, produce and distribute our products, how we extend the product lifecycle through circular options and how we collaborate with partners and organizations for a more sustainable tomorrow. The goals have inspired us, as a company and a brand, to set our own ambitious climate goals for the future.

By 2030, our goal is to **reduce carbon emissions** from our total operations by 50% from the base year of 2021. To achieve this, one step is for all Craft products to be fully made from more preferred materials (recycled materials, e.g.) and more sustainable production methods. Currently, 75 % of our products are fully or partially made from more preferred fibers.

In addition, most of our **packaging** are made from more preferred materials such as recycled plastic and FSC®-certified paper. We are also working to find ways of reducing unnecessary packaging materials.

In terms of **shipping**, we have set a goal to reduce our emissions from air freight as of 2025.

Design for the long run. To us, this means creating functional and innovative products that are developed for a clear purpose, made from durable and sustainable materials, and manufactured according to a high-quality standard to facilitate extended use and recycling. Part of this process has been to develop our Craft design principles and the Lifetime Guarantee program for our baselayers.

To protect our shared arena, we also collaborate with organizations such as RISE Chemical Group to ensure that no prohibited chemicals are used during production.

Branded fabrics & features

VENTAIR™ X

VentAir represents the latest in cutting-edge fabric systems. It's a highly advanced system that offers water and wind protection in combination with excellent ventilation and moisture transport. The system includes three fabric categories with unique characteristics for unique demands.

VENTAIR™ X

Fabric that provides excellent water protection, ventilation and comfort for a wide range of sports. The dedicated athlete's choice.

VENTAIR™ X wind

Fabric that offers excellent wind protection, ventilation and comfort in windy conditions.

The V-series shoes feature a Vibram Megagrip 3 mm rubber outsole for excellent grip on rock and stone. Excellent grip on slippery surfaces. Gravel-free design. Self-cleaning lugs. V Flex design for natural flexibility.

Side: 3 mm

Women Men

COOLMAX®

This high performance fabric contains COOLMAX® fibre, which helps transport moisture away from the body to the outer fabric layer, keeping you cool and dry during intense exercise in warm conditions.

STANDARD 100 by OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety.

SEAQUAL™

The SEAQUAL™ Initiative challenges Plastic Pollution and helps to clean our oceans from marine litter, driving society towards circularity. The SEAQUAL™ Initiative is a unique collaborative model involving NGO's, Fishermen, Local Communities, Researchers, Scientists, Authorities and Private Stakeholders to clean the Ocean floor and surface, rivers and estuaries, beaches and coastline.

The Craft Principle

An intensive training session will result in the body producing a considerable amount of sweat. This is just how it should be and a confirmation that you are pushing your limits. If you are not wearing functional clothes, the sweat will remain in place and block the pores, causing your body heat to rise. Eventually the clothes will turn into a damp, cold and heavy “envelope”, relentlessly hampering your performance. If you are wearing functional clothes, however, the skin will stay dry and you will be able to perform at an ideal working temperature. Craft’s functional clothes, in up to three layers, create a perfect microclimate and provide the basis for optimal performance. Each layer is equally important and complements the rest of the chain.

Baselayer

Baselayer that efficiently transports moisture away from the skin and distributes it on the outside of the garment, where it either evaporates or is passed on to the next layer. For optimal performance and comfort, craft baselayer should always be worn underneath your outer layers, regardless of weather conditions.

Midlayer

Craft midlayer provides insulation and warmth while transporting moisture and excess heat to the next layer or into the surrounding air. When the thermometer creeps downward, this layer enables you to retain valuable body heat without reducing your freedom of movement.

Protection Layer

The third and outermost layer is your shield against the elements and provides comfort and performance no matter the conditions. Transcending the laws of logic, craft protection layer protects against rain, wind and cold at the same time as it releases surplus heat and moisture from the layers underneath.

CRAFT

Wash instructions

Follow the care instructions to extend the function, shape and lifespan of the garment.

General advice

Taking good care of your garment results in better function and protection, allowing you to focus on your training. Don't wash your functional garment more often than necessary; it saves both the clothes and the environment.

Follow the instructions on the product's care label and use an environment-friendly detergent (dose carefully).

To ensure that your garment maintains its shape and to avoid wear and tear, always close zippers, Velcro openings, buckles and buttons before washing.

Don't use fabric softener when washing functional clothes. Softener encapsulates the fibers and thus ruins the fabric's ability to transport moisture.

Material-specific advice

POLYESTER

Wash with similar colors. Clothes with prints should always be washed inside out. Remove the garments from the washing machine immediately after finishing washing. Line dry the garments, preferably in a drying cabinet. Do not tumble dry; it's bad for the environment and wears out the clothes.

WOOL

Some of our knitted products contain wool. Wool has the amazing capacity to self clean outdoors in fresh air, most effectively in damp weather under the cover of a roof. The preferred washing temperature for wool garments is 30 degrees (also called cold wash). Spin carefully. Don't tumble dry. Shape and line dry the garment after washing.

LINED SYNTHETICS & SHELLS WITH PROTECTIVE SURFACE

Air the garment after use. If it's dirty and/or sweaty – wash. Not washing a dirty garment can reduce its breathability. Always follow the care instructions. Line drying works okay but adding heat will reactivate the water-repellent surface of the outer fabric. Use a drying cabinet or iron on low heat.

It's important to re-impregnate your garment to maintain the surface's protective properties. This can be done either in the washing machine or with a spray. Remember to follow the instructions on the waterproofing and ensure that it's designed for breathing garments. It's important for all types of waterproofing to be exposed to heat after application, in order to maximize the effect.

JACKETS WITH DOWN FILLING

Don't wash down garments more than necessary. Often it's enough to clean the garment with a damp cloth. However, down garments can be washed as long as you do it the right way. Always follow the care instructions on the garment and use rather too little detergent than too much.

Down garments should be washed inside out and tumble-dried with tennis balls until they are completely dry.

Turn the garment inside out and make sure there's plenty of room for the jacket in the drum. To reduce wear, always close zippers, Velcro openings and buttons before washing. Choose a delicate cycle, 30°C or 40°C.

Place the washed jacket in a dryer along with three tennis balls. The balls help to distribute the down evenly and to regain its fluffiness. Dry the jacket on low temperature for as long as possible. You can help the down to spread evenly by removing the jacket every now and then, shaking it and loosen up any clumps.

The drying process usually takes longer than you think. Before you end the drying, make sure the jacket is completely dry, light and fluffy. Then hang your down garment on a hanger with lots of space around it.

It's possible to dry without a dryer, but it takes more work. You need a warm, well-ventilated room and have to shake the jacket frequently and thoroughly throughout the drying process to prevent the down from clumping.

What does it mean?

ACRYLIC	see Synthetic fibers.	REGENERATE FIBRE	is the name of art silk developed of the cellulose fibre. Most common is viscose, modal and acetate.
BONDED FABRIC	are two differnt layers of fabric combined into one.	RIBBING	is a pattern in which vertical stripes of stockinette stitch alternative with vertical stripes of reverse stockinette stitch. It gives more elasticity.
CANVAS	is an extremely heavy duty fabric, often made of cotton. Used for making sails, bags, shoes and other funktions where sturdiness is required.	RINGSPUN FABRIC	means of taking the rougher feel of raw cotton and making it smoother to the touch. Essentially, the process for producing ring spun fabric involved using a spinning method, such as on a spinning wheel, to create a slightly finer thread.
CVC	(Chief Value Cotton) is a mix of high quality cotton and polyester, where cotton is more than 50%.	RIP-STOP	is a light-weight nylon fabric with inter-woven ripstop reinforcement threads in a crosshatch pattern.
EASY CARE	is an expression that means easy to handle and manage through time. The product has been treated mechanically or with chemicals to make ironing or pressing easier. The treatment will fade away over time.	SINGLE JERSEY	a fine fabric most often used to make t-shirts.
ELASTANE	is a common name for a synthetic fiber known for its exceptional elasticity. One of the most famous is LYCRA®.	SOFT SHELL	is a term used on soft materials with the ability to block water partially, and comes with different degrees of water resistance and breath ability.
FLEECE	is the common name for a soft fabric, usually made of polyester. Have a short pile and the fabric is both warm and breathable.	SYNTHETIC FIBERS	is a collection name of all fibres that been artificial produced out of synthetic polymers. Most common is polyester, polyamides and acrylic.
GAUGE	is the unit of measure that refers to the knitting machines fineness size.	TACTEL	is a trademarked brand produced by Invista. It has a cotton like feel.
INTERLOCK	is a joined closely knit textile fabric, mostly used as lining.	T/C	is a shortname for polyester/cotton mix, where polyester makes ca 65%.
COMBED COTTON	is a soft version of cotton, a method where the shorter fibres have been removed leaving the fibres well paralleled. The yarn takes colouring better, will get stronger and softer.	TWILL	comes from a method of weaving textiles that have a high wear and tear quality. Jeans, work wear and some shirts are often made from twill.
CARDED COTTON	compared to combed cotton, this process is not as smooth, having more fibres "sticking out" and is often a little bit rougher.	VISCOSE	see regenerate fibres.
LYCRA®	is a registrated brand from INVISTA, see Elastane.	VELCRO®	is a brand name of fabric hook-and-loop fasteners, but it's so well known that it has become the generic term for a type of product.
MESH	is a "net" looking textile, often used in the inside of sport garments.		
MICRO FLEECE	is the same as fleece but with a shorter pile. See fleece.		
OPEN END SPINNING	is a technology for creating yarn without using a spindle. It's not suitable for thin yarn.		
PIQUÉ	is a weaving style, normally used with cotton. Characterized by raised parallel cords or fine ribbing.		
POLYAMIDES	see Synthetic fibers.		
POLYESTER	is the most important fiber of all synthetic fibers, see synthetic fibers.		
PU	is an abbreviation of Polyurethane, which is a water resistant film (or coating) used for example on outwear as jackets and bags.		

Sizing & measurements

Use the chart below to determine your size. If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit. If your measurements for chest and waist correspond to two different suggested sizes, order the size indicated by your chest measurement.

How to measure yourself

MEN

WOMEN

A. CHEST

Wrap a tape measure evenly around the fullest part around the chest under your arms.

B. WAIST

Wrap a measure tape around your natural waistline.

C. SEAT

Standing with your feet together, measure around the fullest part of your hips.

D. SHOULDER AND SLEEVE LENGTH

Measure from the lowest part of the neck, over the tip of the shoulder and down the outside of the arm, past the elbow and to the wrist. Keep the arm slightly bent.

E. INSIDE OF LEG

Standing with your feet together, measure from the crotch all the way down to the floor. Don't forget to stand as straight as possible. You may have to ask a friend to help you.

F. LENGTH

The total length of your body.

Men

Footwear Size Chart

How to measure your feet

STEP 1
Stand up straight on a hard surface with your heel against the wall and a piece of blank paper taped to the floor.

STEP 2
Have someone mark the longest part of your foot (referred to as heel-to-toe length) on the paper with a pen or pencil, or measure yourself if necessary. Repeat with the other foot, as sizes may be different on left and right foot.

STEP 3
Use a ruler to measure the heel-to-toe length you marked for each foot.
