

Sentence in a movie

Complete the sentences and film your scene:

**I walked toand looked forbut it wasn't there.
I looked above.....,under..... and then I saw My was..... Lucky me!**

Now think about how you are going to film your scene
(with at least 6 different shots):

Do you need an overall shot to show where your character is?

Will you also use a close-up to show emotions?

Do you zoom in or follow your character with your smartphone/camera?

Are you making a storyboard?

Who's in my scene? Who and what else do I need?
