THE GREEN CHOICE PROJECT AND OUR COMMITMENT TO SUSTAINABILITY

Green Choice is LEVEL's initiative to create high-performance gloves while reducing environmental impact. This project is a significant part of LEVEL's commitment to becoming fully sustainable, without sacrificing the quality and warmth the brand is known for.

• WHY GREEN CHOICE IS UNIQUE:

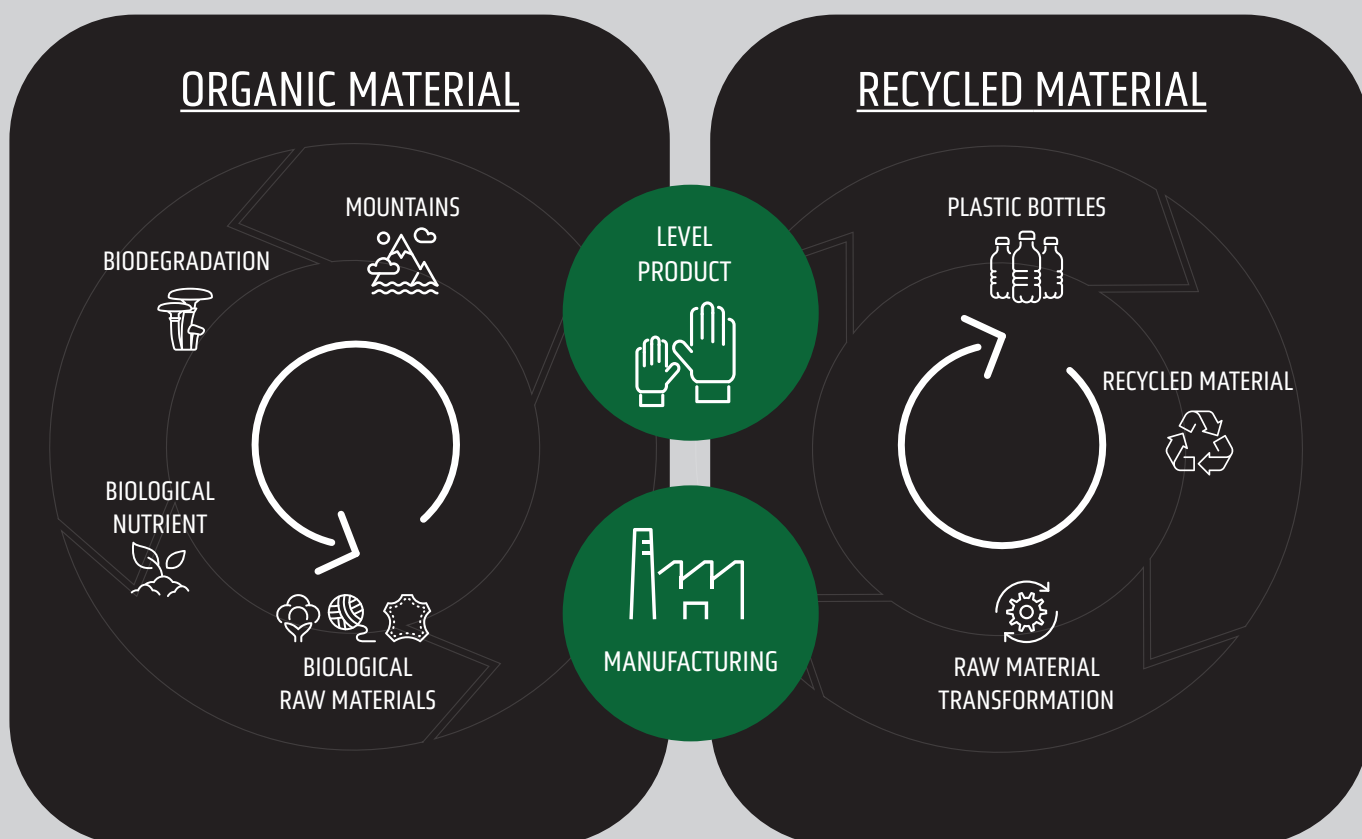

SUSTAINABILITY COMMITMENT: LEVEL is actively redesigning its products to meet sustainability goals by using eco-friendly materials and eliminating plastics in shipping and packaging.

OVER 50% RECYCLED OR ORGANIC MATERIALS: Every Green Choice product is made from at least 50% organic or recycled materials, including leather, Swiss wool, merino wool, silk, and recycled plastic bottles. This significantly reduces the use of new raw materials and lowers environmental impact compared to standard glove production.

• MATERIALS AND ENVIRONMENTAL IMPACT:

ORGANIC MATERIALS: LEVEL carefully selects organic materials that are durable but decompose more easily than synthetics, reducing long-term environmental damage.

RECYCLED MATERIALS: By repurposing materials like plastic bottles, LEVEL decreases the need for virgin materials, minimizing landfill waste and lowering carbon emissions in production.

• COMMUNITY AND ENVIRONMENTAL INITIATIVES:

LEVEL not only focuses on sustainable products but also actively supports environmental causes. The brand partners with organizations like Protect Our Winters (POW) and promotes initiatives like Save Soil and the preservation of Stelvio National Park. Additionally, LEVEL encourages young skiers and athletes to participate in clean-up efforts, fostering environmental awareness in the ski community.

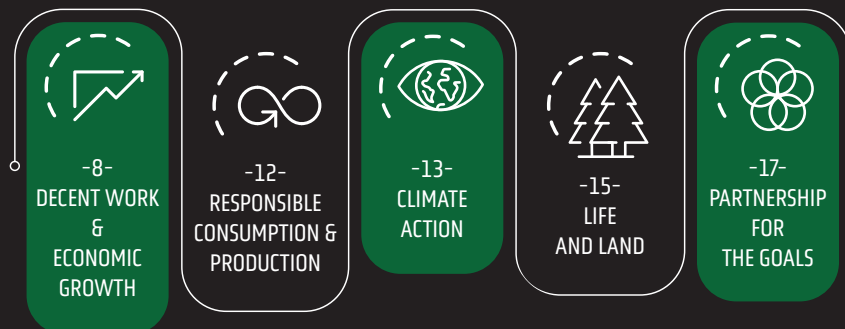

• FUTURE VISION:

Our Research and development team is now working on a sustainability project to reach some of the Sustainable Development Goals (SDG) by collaborating with universities. Join us in our journey to support the future of winter sports.

SDG STANDARD SUSTAINABILITY GOALS

To reach 5 of the Global Goals for Sustainable Development adopted by the United Nations

SDG STANDARD SUSTAINABLE TARGETS

THERMOPLUS

THERMOPLUS is LEVEL's proprietary system designed to ensure superior warmth and comfort in winter gloves. What sets LEVEL apart from other brands is its direct control over the entire production process. LEVEL purchases all materials directly, carefully inspects and tests them in-house using advanced technology before moving to production. This contrasts with most other glove brands that outsource their material selection, losing control over quality.

• WHY THERMOPLUS IS DIFFERENT:

MATERIAL SELECTION: LEVEL personally selects and rigorously tests all materials to ensure they meet the highest standards for thermal insulation and ergonomic comfort. Other brands may not have this level of control over the quality of their raw materials.

IN-HOUSE TESTING: LEVEL uses specialized machines, wireless sensors, and infrared thermography in its own lab to test glove performance in extreme conditions. This guarantees that each pair of gloves provides consistent warmth and protection.

• THERMOPLUS PERFORMANCE LEVELS:

To make it easier for customers to choose the right gloves for their needs, LEVEL has introduced a simple 5-level THERMOPLUS certification system:

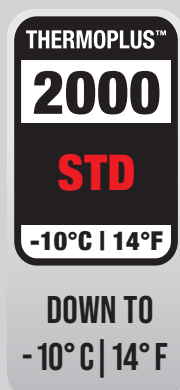

5000 – EXTRA WARM: Down to -30°C (-22°F) for extreme cold.

4000 – VERY WARM: Down to -22°C (-8°F), providing intense warmth for the coldest days.

3000 – WARM: Down to -17°C (0°F), offering balanced warmth and comfort.

2000 – STANDARD: Down to -10°C (14°F), perfect for moderately cold days.

1000 – LIGHT: Down to -5°C (23°F), ideal for mild winter conditions.

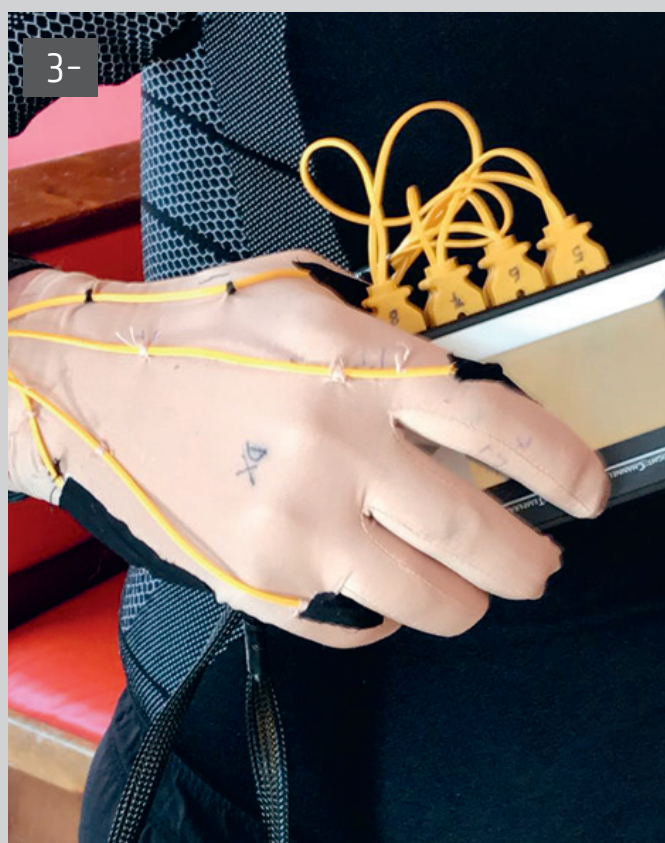

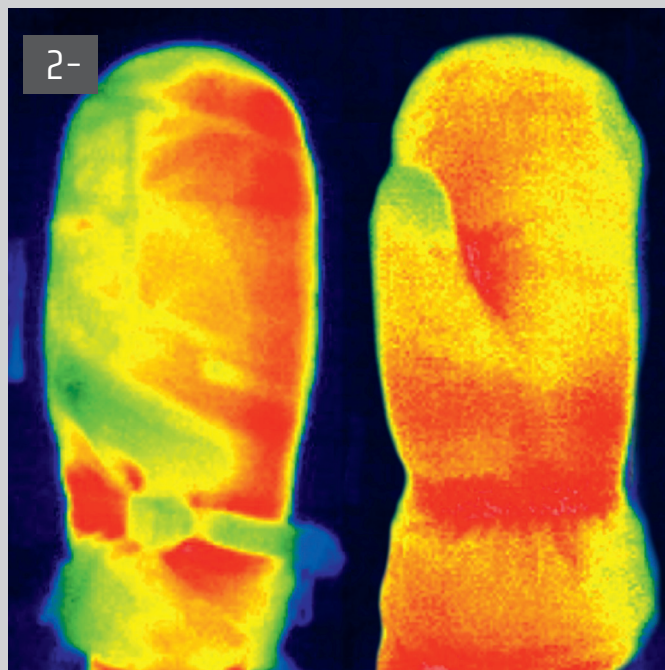

SCIENTIFIC TESTS PERFORMED UNDER THE AUSPICES OF THE DICAM
DEPARTMENT OF BOLOGNA UNIVERSITY – ITALY

• HOW LEVEL ENSURES QUALITY:

1- SPECIALIZED TESTING MACHINE: LEVEL developed a machine to test gloves under extreme weather conditions, collecting data on how well they retain heat.

2 - INFRARED THERMOGRAPHY: This technology visually tracks how the gloves maintain warmth, allowing LEVEL to identify and address any areas where insulation may be lacking.

3 - HAND SENSORS: Placed directly on the skin, these sensors record how well the gloves perform in real conditions, ensuring the data reflects actual user experiences.

FINDING THE GLOVE SIZE

When it comes to selecting the ideal glove size, it's essential to consider two key measurements of your hand:

1. HAND LENGTH:

- Begin with your hand open and fingers extended.
- Measure from the tip of your middle finger down to the base of your palm, following a straight line.

2. HAND CIRCUMFERENCE:

- Start with your hand open and fingers extended.
- Measure the circumference of your hand, encircling it at the base of your knuckles.

By taking both of these measurements into account, you'll be on your way to finding the perfect fit for your gloves, ensuring optimum comfort and performance during your winter adventures.

CIRCUMFERENCE		HAND LENGTH		MEN'S SIZE		WOMEN'S SIZE		JUNIOR'S SIZE

LEVEL LEATHER – HIGH QUALITY, LOW IMPACT

SUSTAINABLE, SAFE, AND ETHICAL LEATHER CHOICES

Environmental Impact: 30% Less Water

LEVEL's leather production process uses 30% less water compared to traditional methods. This significant reduction in water usage helps minimize the environmental footprint of our gloves, contributing to a more sustainable manufacturing process without compromising on quality.

Chemical Impact: No Harmful Chemicals

LEVEL is committed to producing leather that's free from harmful chemicals such as Chrome 6, Formaldehyde, Hzo, and Carbon. By avoiding these substances, we ensure that our tanning process is eco-friendly and safe, making our gloves better for both users and the environment.

Ethical/Social Impact: Worker Protection

At LEVEL, worker safety is a top priority. We implement strict safety procedures in all production facilities to protect our workers, ensuring that ethical practices are followed throughout the leather production process. This commitment guarantees a safe and fair working environment for everyone involved.

LEVEL'S CERTIFIED FABRICS: PERFORMANCE MEETS RESPONSIBILITY

At LEVEL, certified fabrics ensure that our gloves meet the highest standards for both quality and sustainability. By incorporating GRS Recycle, Blue Sign, Oekotex, and PFC-free materials, we ensure our gloves are not only high-performing but also eco-friendly. These certifications help us minimize environmental impact and prioritize safety, aligning with LEVEL's commitment to responsible production and long-lasting quality.

GRS Recycle

Mention that LEVEL uses recycled materials to reduce the environmental footprint.

Blue Sign

State that Blue Sign ensures safe chemical use and responsible resource management.

Oekotex

Say that Oekotex guarantees fabrics are free from harmful chemicals, ensuring safety for users.

PFC Free

Highlight that LEVEL's fabrics are free from PFCs, protecting both the wearer and the environment.

- 100% SAFE, ECO-FRIENDLY FABRICS.
- PROTECTION FOR PEOPLE AND THE ENVIRONMENT.
- RESPONSIBLE RESOURCE USE.

INSULATION MATERIALS

At LEVEL, we understand the importance of keeping hands warm and comfortable in all winter conditions. We offer a range of premium insulation materials that provide excellent warmth, comfort, and breathability. Many of these materials are also environmentally friendly, made from recycled or organic sources.

• ORGANIC INSULATION MATERIALS:

SWISS WOOL:

- Natural and Sustainable: Sourced from the Swiss company Fiwo, which shares LEVEL's values for environmental responsibility.
- Antimicrobial and Odor-Resistant: The thin fibers do not retain odors and keep hands dry by drawing moisture away from the skin.

MERINO WOOL:

- Natural Temperature Regulation: This wool keeps hands warm and dry, making it perfect for high-performance activities.
- Soft and Comfortable: Its natural properties ensure warmth without overheating.

• RECYCLED INSULATION MATERIALS:

PRIMALOFT:

- Water-Repellent: Unlike down, PrimaLoft won't absorb water, ensuring warmth even when wet.
- Soft and Breathable: Provides a warm and comfortable feel while allowing moisture to escape.

PRIMALOFT THERMOPLUME:

- Fully Recycled Alternative to Down: Made from 100% post-consumer recycled materials, this is a sustainable insulation that mimics the warmth and softness of down.

RECYCLED LOFT:

- 100% Recycled Content: Provides excellent thermal insulation while optimizing warmth and comfort using recycled materials.

LOFT PREMIUM:

- Soft and Warm: This new insulation by LEVEL combines a soft feel with great thermal benefits for added comfort.

• OTHER HIGH-PERFORMANCE INSULATIONS:

POLARTEC:

- 4-Way Stretch and Breathable: Offers warmth without weight and unrestricted freedom of movement, making it ideal for active use.
- Wind-Resistant: Keeps hands warm while reducing the effects of wind chill.

THINSULATE™:

- Efficient Heat Trapping: Its microfibers are ten times smaller than other synthetic insulations, making it excellent at trapping warmth.
- Prevents Cold Spots: Fills airspaces in the gloves to avoid cold spots and ensure consistent warmth.

THINSULATE™ PLATINUM:

- Exceptional Warmth and Water Resistance: Made from synthetic hydrophobic fibers, this insulation keeps hands warm and dry.
- Soft and Versatile: Available in different gram weights, providing options for various needs and climates.

9044PO - MULTY DISPLAY

Our new MULTY DISPLAY is designed to bring the excitement of LEVEL racing products directly into your store. This display is an essential tool for store owners and Level reps, offering an organized, eye-catching way to showcase our high-performance gloves, mittens, backpacks, and apparel. With vibrant images of our athletes in action, it creates an immersive experience that captures the attention of both ski enthusiasts and racers alike.

The MULTY DISPLAY is a powerful merchandising tool designed to highlight the wide range of LEVEL products. With its modular design, this display can be customized to meet the needs of any store, offering 5 interchangeable visuals that cover the main product categories: Thermoplus, Green Choice, Racing, Freeskiing, and Women's Collection.
