THE GIANT LEAP

10 years ago, BESV set out with a vision to contribute to a better environment by getting people out of their cars and riding e-bikes, transforming the way we move. Not just by building electric bikes, but by designing a new future of motion - elegant, intelligent, and electric.

Now, a decade later, the next era begins. Powered by possibility, we're reenvisioning the e-bike experience.

*This isn't just a product launch. It's a landing.
A flag marking new ground.*

Inspired by humanity's most iconic leap, we've imagined our machines as lunar rovers. Built not just to ride - but to explore, to inspire, and to push beyond limits.

2

**WE ARE BESV.
EMPOWERING PEOPLE
TO GO FURTHER.
RIDE THE FUTURE WITH US.**

ONE SMALL STEP
EST.2014

TO THE MOON AND BACK

Every day, the heart creates enough energy to drive a truck 20 miles. In a lifetime, that is equivalent to driving to the moon and back.

ONE GIANT LEAP 2025 AND BEYOND

Just like mankind's challenge to land on the moon, we are challenging ourselves to take a leap into the future. Empowering people to go further, with everything we have, to the moon and back, with every heartbeat.

Besv
RIDE THE FUTURE

OUR STORY

BESV was founded on enduring principles which are represented in our name.

— SCAN TO WATCH VIDEO —

5

BEAUTIFUL

B is for Beautiful. BESV e-bikes are not only functional in use but also beautiful in appearance. Our intention is to create products that capture the eye and stimulate imagination. We put creativity and this desire to inspire people at the heart of our design process.

ECO-FRIENDLY

E is for Eco-friendly. As an international company, we take our responsibility towards the environment seriously. We believe in using innovative technologies to develop durable products, and promote sustainable mobility - more cycling, less car-driving.

SMARTER

S is for Smarter. We use the most advanced technologies to create intelligent products that optimize the user experience. Our e-bikes are responsive and intuitive to different users and conditions, making a BESV ride a smart ride.

VISION

V is for Vision. These three principles (Beautiful, Eco-friendly, Smarter) form the first three letters of our name, and represent the Vision of everything we do. BESV was born from a vision which it still pursues today: combining passions for technology, cycling and the environment, to produce premium e-bikes that provide an exceptional riding experience.

OUR PURPOSE

Connection

At BESV, we are not just crafting e-bikes, we are redefining urban mobility and outdoor adventure with sustainability at our core. Our purpose is to empower every rider's journey with cutting-edge technology, ensuring a harmonious balance between human mobility and environmental stewardship.

THE RIDER INNOVATION MEETS DESIGN

Our mission extends beyond mobility. BESV e-bikes embody the pinnacle of design and innovation, reflecting our commitment to excellence and the joy of exploration. We strive to create e-bikes that not only perform exceptionally but also inspire connection, connecting the rider to the journey and not just with their destination.

THE ENVIRONMENT
A RIDE TOWARDS A GREENER FUTURE

By providing efficient, eco-friendly transportation alternatives, BESV is dedicated to pioneering a greener future. Our vision is a world where every ride contributes to the well-being of our planet. We believe in promoting healthier lifestyles, healthier communities and connection with the environment.

INNOVATION FOR INCLUSION

BESV is dedicated to promoting inclusivity within our communities by making e-biking accessible to everyone. We believe in breaking down barriers, ensuring our technology improves mobility for all ages and abilities.

OUR VALUES

Connecting communities
with our core values.

ETHICAL ENGINEERING

We prioritize ethical engineering practices, ensuring our products are developed with respect for the environment, our employees, and our customers. BESV stands for responsible innovation that contributes to a better tomorrow.

UNWAVERING QUALITY

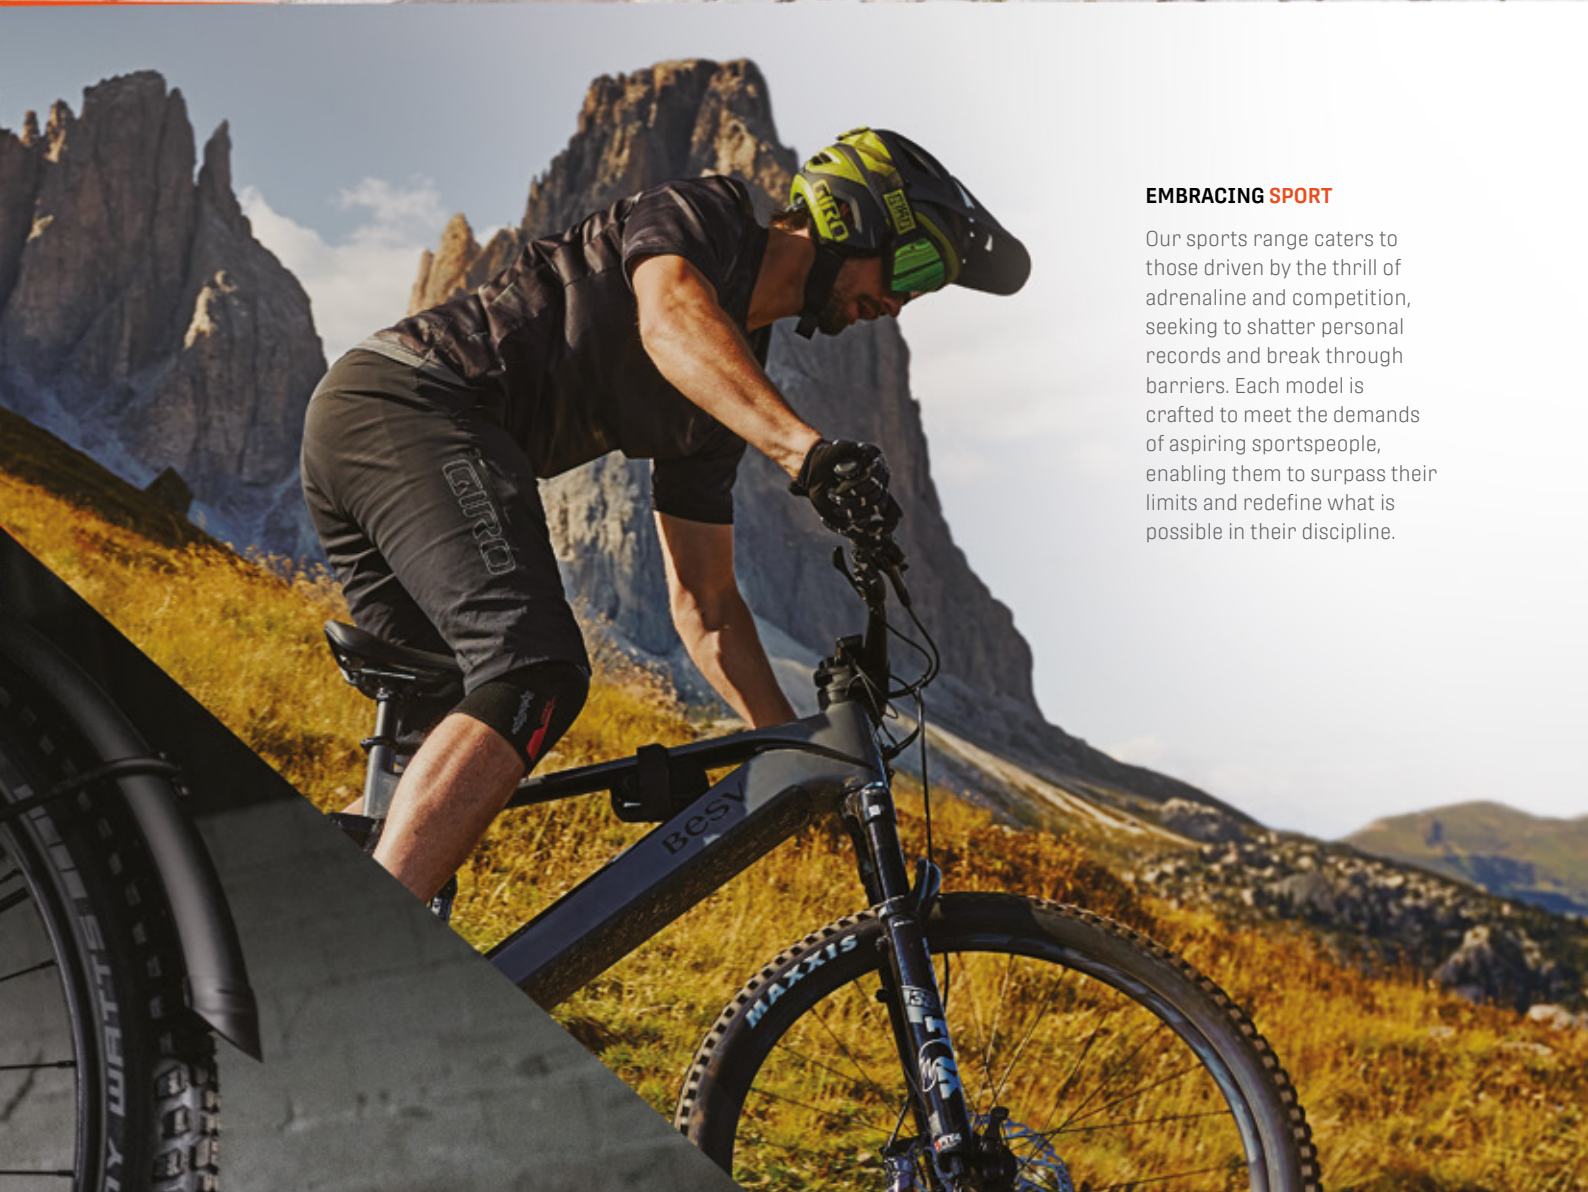

Premium quality is the cornerstone of every BESV product. Our commitment to excellence is unwavering, ensuring every e-bike we produce meets rigorous standards of durability, reliability, and performance.

CULTIVATING JOY

BESV values the joy of riding. With every pedal, we aim to spark excitement and exploration, enhancing the wellbeing of our riders. Whether it's a leisurely cycle through the city or an exhilarating ride across trails, BESV is committed to making every journey enjoyable and memorable.

9

EMBRACING SPORT

Our sports range caters to those driven by the thrill of adrenaline and competition, seeking to shatter personal records and break through barriers. Each model is crafted to meet the demands of aspiring sportspeople, enabling them to surpass their limits and redefine what is possible in their discipline.

PERFECT MATCH

Connecting the rider with our e-bike

TAILORED TO **YOUR** JOURNEY

At BESV, we understand that a perfect fit is key to the ultimate e-biking experience. Our comprehensive fitting process ensures each BESV e-bike aligns with the rider's physique and riding preferences, maximizing comfort, efficiency, and enjoyment.

ERGONOMICS ENGINEERED FOR **EXCELLENCE**

BESV's dedication to rider satisfaction extends to the ergonomic engineering of each e-bike. We focus on creating a riding experience that feels natural and effortless, ensuring every component, from the handlebars to the pedals, is optimized for your comfort and control.

ADAPTING TO **EVERY** RIDER

Our adaptive fit technology means every BESV e-bike can be adjusted to suit a wide range of body types and riding styles. Whether you're commuting to work or exploring rugged trails, we ensure a fit that feels like it was made just for you.

GREEN DESIGN

The green connection between
manufacturing, designing
and the environment

11

HARMONIZING HUMAN TOUCH WITH GREEN MANUFACTURING

BESV's commitment to a sustainable future is deeply rooted in our manufacturing ethos, where human creativity meets eco-friendly technology. Our skilled artisans and engineers work in harmony with the environment, utilizing renewable energy sources and sustainable materials to craft each e-bike. This people-centered approach ensures that every hand that touches our bikes contributes to a cycle of positive impact, from reducing carbon footprints to promoting a culture of environmental responsibility within our communities and beyond.

CITY^{e-bikes}

Designed for modern city life. A BESV city e-bike is more than transport. It's an unbeatable everyday companion, perfect for everything from quick errands to longer commutes. Each model features a sturdy frame, comfort-focused geometry, and an integrated rear carrier, so you can cruise through urban streets with ease.

Whether you choose a Bosch or SHIMANO drive system, you'll enjoy smooth power delivery and swift acceleration — and, thanks to an exciting software upgrade, Bosch-powered models now offer between 75Nm and 90Nm of rated power.

We also offer both chain and Gates belt drive options, plus a choice of SHIMANO Nexus or Enviolo internal hub gears — and even a coaster brake on select models. No matter your preference, our City e-bikes turn every trip into a relaxed, enjoyable ride.

NEW CT-B LS MODELS

SILENT STUNNERS. SMOOTH AND STRONG.
LOW, WIDE AND READY TO GLIDE - WITH POWER TO MATCH THE POLISH.

STEP IN, STAND OUT

Low and wide for easy on-and-off access, the step-through frame is beautifully contoured and ultra-smooth thanks to precision welding. It's as functional as it is stylish—with a bold yellow-brass or matte gray finish and a 160kg gross weight allowance for you and all your gear.

14

PLUG IN WITH STYLE

Cleverly tucked behind the headtube badge, the charging port stays protected and looks sharp. Even better, it's placed up front so parking and plugging in is a breeze—no awkward tilting or socket searching required.

CITY POWER REFINED

A powerhouse in a polished package. With up to 90Nm of torque, Bosch's latest motor brings unexpected punch to a city bike. BESV's custom "Air-Flow" motor cover protects the system while optimizing airflow — cool inside, cool outside.

15

ROLL EASY

Big wheels, smooth feel. The fast-rolling 700c tires are designed with a comfort-oriented tread pattern that glides across pavement while still soaking up bumps. You get a cushioned, confident ride — without sacrificing speed.

CT-B 1.0 LS

E-SYSTEM

Smooth and fast ride with the Bosch Performance PX motor, matched with a Bosch PowerTube 800Wh battery. This system is compatible with the Bosch Smart System.

SAFETY

Powerful lights from Lezyne and Sate-Lite keep you safe when riding.

SADDLE

Whether it's long distance or everyday rides, cycle in comfort with the Selle Royal Orbis.

COMPACT e-bikes

Small in size, big on versatility. For on-the-go urban lifestyles, ride your Compact everywhere everyday. Built to dart through busy streets, fit neatly into tight spaces, and accommodate a wide range of riders. With our newest Heavy Duty model, you can even carry larger loads without sacrificing agility.

Powerful motors, sleek designs, and multiple drivetrain options — such as chain or belt drive — provide a stylish, efficient way to explore the city. Whether it's daily commuting or weekend errands, these e-bikes offer all the convenience you need in a neat, compact package.

COMPACT SERIES

**COMPACT.
CAPABLE.
CLEVER.**

Smart design, simple comfort —
built for the daily ride and beyond.

34

**ONE BIKE.
EVERY BODY.**

One size fits all. With a frame
geometry designed for easy
handling and a telescopic
seatpost that adjusts to riders
from 155–190cm, it's the bike
everyone in the family can enjoy.

COMFORT YOUR WAY

Dial in your perfect fit—no tools needed. Raise, lower, or swivel the handlebars in seconds. It's the fast, fuss-free way to share your ride or switch it up.

Besv

35

QUIET OR CLASSIC

Go clean and silent with a low-maintenance belt drive, or choose a classic chain setup with derailleur gearing. However you roll, there's a model that fits your ride style.

SEE CLEARLY, RIDE SAFELY

See and be seen. With a powerful 115-lux headlight lighting your way and an integrated reflector catching attention from every angle, this setup ensures confident riding from dusk to dawn.

TREKKING e-bikes

Adventure-ready. Go the extra mile. From scenic weekend escapes to extended tours, our Trekking e-bikes deliver the power and dependability you need for your next big adventure.

Designed for extended journeys, our Trekking e-bikes boast high-capacity batteries, versatile drivetrains, and plush suspension. With a choice of Bosch or SHIMANO e-bike systems — Bosch-equipped models now delivering 90Nm of rated power thanks to the newest software update — you can tailor your setup for optimal performance.

Sturdy racks, ergonomic saddles, and a geometry made for all-day comfort let you explore farther with ease. Whether it's uphill climbs, flat-ground sprints, or fully loaded bike-packing tours, these models ensure a smooth and confident ride.

NEW TR-B MODELS

PATH FINDERS. TOUGH AND THOUGHTFUL.

Built to go the distance—
with strength, tech and
standout style.

SLEEK, SMOOTH, STURDY

Bold, clean lines meet serious strength. The frame has a modern, seamless tube design with a premium finish — built to handle it all, offering an impressive 160 kg gross weight allowance for rider, gear, and cargo.

EFFORTLESS MOMENTUM

Climb hills, cut through wind, and cover more ground with ease. The latest Bosch Performance PX motor delivers 90Nm of torque for strong, smooth power on demand. The custom BESV cover keeps the motor safe from trail debris and dust—so you can go further, worry-free.

INTEGRATED POWER, EXPANDABLE RANGE

Big power, beautifully tucked away. The 600 or 800Wh Powertube sits cleanly inside the downtube, protected by a color-matched cover with a smooth push-button release for easy access. Want to go even farther? Add the optional Bosch PowerMore range extender and keep the adventure rolling.

43

STAY IN CONTROL

At a glance, get everything you need. The left-mounted controller lets you toggle support modes without taking your hands off the bar, and the bright central color display shows your speed, route, battery level, and range—clearly and intuitively.

TR-B 1.0

E-SYSTEM

Smooth and fast ride with the Bosch Performance PX motor, matched with a Bosch PowerTube 800Wh battery. This system is compatible with the Bosch Smart System.

DRIVETRAIN

High-performance, 11-speed, SHIMANO CUES drivetrain with 11-45 teeth cassette.

DUAL SUSPENSION e-MTB

Push your limits. Conquer any mountain. Whether you're a seasoned competitor or a weekend warrior, these bikes deliver the power, control and versatility to redefine your off-road experience.

This year, we're excited to offer our Dual Suspension e-MTBs with both SHIMANO and Bosch drive systems — something we've never done before. Bosch-equipped models now include the newest software update, delivering 100Nm of rated power for exceptional off-road capability.

Choose from carbon or aluminum frames, equipped with top-tier components and powerful motors for unrivaled performance. Front suspension travel options range from 130mm to 170mm, paired with suspension systems by leading brands like Fox, RockShox and Suntour.

NEW TRS-B MODELS

POWER MEETS PLAY.

Fierce, full-suspension e-MTBs
for shredding slopes with style.

RIDE HARD. LAND SMOOTH.

Built for control when it counts, the TRS-B frame blends bold, sporty lines with a refined suspension system that stays smooth and efficient through the full range of travel. Whether you're flying downhill or hammering climbs, this is all-terrain muscle with all-day comfort—rated for a full 160kg of total ride weight.

LIGHT THE LINE

Because the trail doesn't stop at sundown. The Lezyne eBike Power E115 headlight and integrated Supernova TL3 Mini rear light keep you visible and focused—whether you're ripping through singletrack or just riding home late.

PLUG IN. CHARGE ON.

Easy access meets extended adventure. The side-mounted port lets you plug in quickly—no awkward positioning. Add a Bosch PowerMore range extender right on the downtube for the extra juice when your ride goes long.

TOUGH HOUSING. COOL THINKING.

A reinforced motor cage with D-shaped bracing keeps the Bosch Performance CX Gen 5 motor solidly protected. BESV's "Air-Flow" cooling fins help dissipate heat on tough climbs. This isn't just a cover—it's armor for your 100Nm torque machine.

TRS-B 170 1.0

E-SYSTEM

Smooth and fast ride with the Bosch Performance CX motor, matched with a Bosch Powertube 800Wh battery. This system is compatible with the Bosch Smart System.

HARDTAIL e-MTB

Experience the thrill of the trail. Every hard-tail model is built to help you tackle rough terrain with ease—whether you're exploring gravel paths or charging along cross-country routes.

We offer both Bosch and SHIMANO drive systems, so you can choose the perfect setup for your ride. SHIMANO-powered bikes feature a robust 85Nm motor, while our Bosch-equipped models — upgraded with the newest software — now deliver 100Nm of rated power.

With front fork travel ranging from 100–120mm and options for step-over or low-step frames, you'll enjoy excellent control and comfort on any adventure. Select from various battery capacities to keep the fun going all day. Whether it's your weekend escape or daily off-road workout, our Hardtail e-MTBs turn every outing into pure riding pleasure.

NEW TRX-B MODELS

HARDTAIL, FULL THRILL.

Stripped back to the essentials — sleek design, big torque, and a ride that's made to move.

FORM THAT FOLLOWS FLOW

Precision-built for performance and style. The TRX-B's frame blends sharp geometry with smooth lines from stem to dropout — bringing together aesthetics and agility. Built for performance and designed for durability, it supports a gross weight limit of 140kg—so you can ride with confidence, gear up for longer trips, or simply enjoy a sturdier feel on every trail.

READY FOR IMPACT, DESIGNED FOR FLOW

The 100Nm Bosch motor gives you muscle on command, with smooth delivery and serious climbing ability. A custom BESV cover adds protection and subtle air flow — keeping performance high and heat low, ride after ride.

GEARED FOR EVERY ADVENTURE

No climb too steep, no descent too fast. With a wide gear ratio, you'll find the right cadence whether you're crawling up switchbacks or speeding down open roads. Confidence and control, shift after shift.

TAKE THE EDGE OFF

Every jump, bump, and root handled with 120mm of responsive front travel. It's the perfect pairing for a hardtail: sporty feel with just enough cushion to keep your hands and handling sharp.

TRX-B 1.0

E-SYSTEM

Embrace the ultimate e-bike system with Bosch: featuring the powerful Performance CX motor and the expansive PowerTube 750Wh battery for unmatched efficiency and range.

DRIVETRAIN

Enhance your cycling performance with the SHIMANO XT derailleur, offering smooth, precise gear changes for a flawless riding experience.

BRAKES

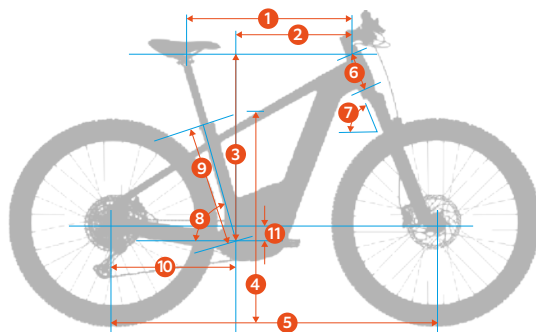

Experience unmatched stopping power and control with the 4-piston SHIMANO brakes, engineered for precision and reliability in any condition.

SADDLE Selle Italia X3 eBike

SEATPOST Promax SP-726

GROSS WEIGHT ALLOWANCE 140KG

A full-page background image showing a bicycle with a dark blue pannier bag parked on a dirt path next to a large pile of cut logs. The logs are stacked in a way that shows their circular cross-sections, which have a warm, golden-brown hue. The background is filled with dense green foliage, creating a sense of being in a forest. The overall lighting is soft and natural, highlighting the textures of the wood and the leaves.

SUV^{e-bikes}

Take on any terrain. Think of these hybrid models as two-wheeled sport utility vehicles, ready to tackle daily commutes, off-road trails, or quick grocery runs.

Built on our MTB platforms — both hardtail and full-suspension — our SUV e-bikes come fully equipped with fenders, lights and rear carriers for exceptional versatility.

Choose between Bosch and SHIMANO e-bike systems for smooth, responsive power — Bosch equipped models now offer 90Nm to 100Nm of rated power, thanks to the latest software update. Whether you're zipping through the city or exploring forest paths, these SUV e-bikes deliver comfort, convenience, and confidence in every ride.

NEW TRS-B SUV LINE

GO OFF-ROAD. STAY ON TRACK.

Dual-suspension e-MTBs, upgraded with all-terrain utility — SUVs built to conquer mountains, cities, and everything in between.

SEE MORE. DO MORE.

A big, bright Bosch display puts all your ride data front and center—speed, range, route, and more. And with a comfort-tuned saddle beneath you, those long rides feel like less of a stretch and more of a joy.

LIGHT UP EVERY RIDE

Designed for all-day and after-dark adventures. This high-lumen front light cuts through the gloom with clarity, making you visible and your path clearly lit — on or off the beaten track.

BUILT TO CARRY. READY TO GO.

Strong, sleek, and adventure-ready. The rear carrier supports MIK and MIK HD-compatible bags and panniers. With flowing lines and a fully integrated tail light that includes brake detection, this carrier blends everyday practicality with elevated design — whatever your cargo.

93

CONFIDENCE IN EVERY TERRAIN

Whether you're exploring dirt trails or taking on rougher roads, the front suspension smooths out the ride. With up to 140mm of travel, you'll glide over bumps and stay in control — wherever your wheels take you.

GRAVEL e-bikes

Gravel and Adventure. Bring on the ride. Seek new horizons with a bike that blends road efficiency and off-road capability.

Our Gravel e-bikes feature lightweight frames, carbon forks, and removable wheels for easy transport and storage. Generous tire clearance ensures reliable grip and comfort across varied terrains, while the nimble geometry keeps you in control, no matter the distance.

Designed to excel on smooth tarmac, rough backroads, and adventurous bike-packing trips, they offer the power and stability to tackle any route. The models' high-performance rear hub Bafang motors mean better traction and a more natural ride feeling. Whether you're planning a weekend getaway or an extended tour, these e-bikes are your all-in-one companion for every journey.

TIRES

Maxxis Rambler are highly rated gravel-bike tires, with a durable tread pattern ideal for unpaved terrain.

BRAKES

Go full speed and stop anytime thanks to SHIMANO GRX hydraulic disc brakes.
