Introduction

Overview

The Commodity messages, the MTs 60n and MTs 62n, consist of messages sent to or exchanged between financial institutions involved in commodity-based transactions.

These messages include:

- trade confirmations
- settlement instructions/advice
- statement information

Changes

This book contains the Category 6 Commodities messages, the MTs 60n and MTs 62n, and the Common Group messages, the MTs 69n.

For information about other Category 6 messages, see [Category 6 Reference Data](#).

This volume incorporates the following changes to Category 6 - Treasury Markets - Commodities as noted in the Standards Release Guide (SRG) 2023 and the relevant updates to the SRG 2023:

- MT 600 and MT 601: Add new code to field 22L to allow reporting in Switzerland of derivatives trades with a jurisdiction reporting code for the Swiss Financial Market Infrastructure Act. Code FMIA is already being populated in field 22L by Swift users, this change seeks to add the code to the user handbook.
- MT 600 and MT 601: Update usage rules to refer to the correct ISDA Master Agreement to use for commodity trades.

Swift continually applies editorial enhancements to its documentation to improve quality and ensure consistency. These changes are not published but are controlled in order to ensure that they have no impact on FIN validation.

Important This volume contains information effective as of the November 2023 Standards release. Therefore the 22 July 2022 edition of the Standards MT User Handbook volumes remains effective until November 2023.

Volume Formatting Explanation

This volume of the Standards User Handbook set contains general information about the category and a detailed description of each message type which is currently available for use. For each message type, the following information is provided:

Message Type Scope

The scope specifies the Sender and Receiver of the message and provides an explanation on how the message is used. In some messages, an example of the message flow is also provided.

Message Type Format Specifications

The format specifications are the rules for the layout of the message type. This information is provided in table form with the following information:

MT nnn (Message Type Name)

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	21	Related Reference	16x	2
Mandatory Sequence A (Sequence Name)				
M	25	Account Identification	35x	3
M	32a	Value Date, Currency Code, Amount	C or D	4
-----> Optional Repetitive Sequence B (Sequence Name)				
O	52a	Ordering Institution	A or D	5
M	71B	Details of Charges	6*35x	6
O	72	Sender to Receiver Information	6*35x	7

M = Mandatory O = Optional - Network Validated Rules may apply				

- **MT nnn (Message Type Name)** provides the message type number and name
- **Status** indicates if the field is
 - **M** = Mandatory
 - **O** = Optional - Network Validated Rules may apply

The status **M** for fields in optional (sub)sequences means that the field must be present if the (sub)sequence is present and is otherwise not allowed.
- **Tag** is the field identification.
- **Field Name** is the detailed name of the field tag, for this message type.
- **Content/Options** provides permitted field length and characteristics. For information concerning field structure, notation and character restrictions, see the [Standards MT General Information](#).
- **No.** identifies the number of the field in the Field Specifications for the message type.

Some messages are separated into sequences of fields, as shown above. An arrow indicates that a sequence of fields may be repeated.

MT Network Validated Rules

Network validated rules are validated on the network, that is, rules for which an error code is defined. Rules specified in this section affect more than one field in the message, placing a **condition** on one of the fields specified. They are identified as **Cn**, or conditional rules.

MT Usage Rules

Usage rules are not validated on the network, that is, rules for which no error code is defined, but are nevertheless mandatory for the correct usage of the message. Rules specified in this section affect more than one field in the message, or more than one Swift message.

MT Guidelines

Guidelines are not validated on the network and are not mandatory for the correct usage of the message. They concern good practices. Guidelines specified in this section affect more than one field in the message, or more than one Swift message.

MT Field Specifications

The rules for the use of each field in the message are specified in this section. Each field is identified by its index number (as shown in the **No.** column of the MT Format Specifications), field tag and detailed field name, followed by a description of the field, which may contain some or all of the following:

- **FORMAT** specifies the field formats which are allowed for the field.
- **PRESENCE** indicates if the field is mandatory, optional or conditional in its sequence.
- **DEFINITION** specifies the definition of the field in the message type.
- **CODES** lists all codes available for use in the field. If there is more than one subfield for which codes are defined, each separate code list will be identified with a **CODES** heading. When a list of codes is validated by the network, the error code will be specified.
- **NETWORK VALIDATED RULES** specifies rules that are validated on the network, that is, rules for which an error code is defined. Generally, rules specified in this section affect only the field in which they appear. In some cases, rules which are validated at the message level, that is, rules which affect more than one field, are repeated in this section. This is the case when the rule does not affect the presence of the field, but information within several fields, for example, a currency which must be the same for more than one field in the message.
- **USAGE RULES** specifies rules that are not validated on the network, that is, rules for which no error code is defined, but are nevertheless mandatory for the correct usage of the field. Rules specified in this section affect only the field in which they appear.
- **MARKET PRACTICE RULES** specifies rules published by the Payments Market Practice Group (PMPG). It informs the reader of the existence of a global market practice document on the business process in which the concerned field is used. The absence of a market practice rule notation does not mean that no market practices exist for the concerned field. The presence of a market practice rule is merely an indicator of a known market practice. Furthermore, readers should be aware that in addition to global market practices there may also be country specific requirements that should be considered when using the field. For more details on PMPG market practice documentation, refer to www.pmpg.info.
- **EXAMPLES** provides one or more examples of the field as it will be formatted/used.

MT Mapping

MT mapping provides an explanation of how to map the fields of the message into another Swift message, either of the same or a different message type.

MT Examples

Examples are provided to illustrate the correct use of a message. Examples always include the following information:

- **Narrative** provides a brief description of a transaction
- **Information Flow** illustrates the relationships between the parties involved in the message. An explanation of the flow diagram can be found in the [Standards MT General Information](#).
- **Swift Message** provides the message using the defined Swift format, and providing an explanation, where necessary, of the fields which have been used.

Category 6 Commodities Message Types

The following table lists all message types defined in category 6 Commodities.

For each message type, there is a short description, an indicator whether the message type is signed (Y or N), the maximum message length for input (2,000 or 10,000 characters) and whether the use of the message requires registration with Swift for use in a message user group (Y or N).

MT	MT Name	Purpose	Signed ⁽¹⁾	Max. Length	MUG
600	Commodity Trade Confirmation	Confirms the details of a commodity trade and its settlement	N	2,000	N
601	Commodity Option Confirmation	Confirms the details of a commodity option contract	N	2,000	N
604	Commodity Transfer/Delivery Order	Instructs the Receiver to transfer by book-entry, or physically deliver, a specified type and quantity of commodity to a specified party	Y	2,000	N
605	Commodity Notice to Receive	Notifies the Receiver of an impending book-entry transfer or physical delivery of a specified type and quantity of commodity	N	2,000	N
606	Commodity Debit Advice	Advises the Receiver of a debit entry to a specified commodity account	N	2,000	N
607	Commodity Credit Advice	Advises the Receiver of a credit entry to a specified commodity account	N	2,000	N
608	Statement of a Commodity Account	Provides the details of all bookings to a commodity account	N	2,000	N
620	Commodity Fixed Loan/Deposit Confirmation	Confirms the terms of a contract relative to a commodity fixed loan/deposit transaction.	N	10,000	Y
690	Advice of Charges, Interest and Other Adjustments	Advises an Account Owner of charges, interest or other adjustments to its account	Y	2,000	N
691	Request for Payment of Charges, Interest or Other Expenses	Requests payment of charges, interest and other expenses	Y	2,000	N
692	Request for Cancellation	Requests the Receiver to consider cancellation of the message identified in the request	Y	2,000	N
695	Queries	Requests information relating to a previous message or amendment to a previous message	Y	2,000	N

MT	MT Name	Purpose	Signed ⁽¹⁾	Max. Length	MUG
696	Answers	Responds to a MT 695 Queries message or MT 692 Request for Cancellation or other messages where no specific message type has been provided for the response	Y	2,000	N
698	Proprietary Message	Contains formats defined and agreed to between users and for those messages not yet live	Y	10,000	N
699	Free Format Message	Contains information for which no other message type has been defined	Y	2,000	N

(1) A Relationship Management Application (RMA) authorisation is required in order to sign a message.

Note

A Message User Group (MUG), for the purposes of this book, is a group of users who have voluntarily agreed to support the specified message type and have registered with Swift to send or receive the specified message type. These messages are indicated in the preceding table in the column MUG.

*Registration is free of charge. To register to use one or more message types, submit a registration request (**Order Message User Group**) through **mySWIFT** > Order, change or terminate products > Order Products and Services > Message User Group (MUG).*

*To withdraw from a MUG, use the **Terminate your MUG subscription** request. The form is available through **mySWIFT** > Order, change or terminate products > Terminate and deactivate > Message User Group (MUG).*

To get the list of other members of a particular MUG, please contact Support.

MT 600 Commodity Trade Confirmation

MT 600 Scope

This message type is exchanged by or on behalf of the institutions or corporates, party A and party B, which have agreed to a commodity trade. This message is also used when one of the trading parties is a fund manager.

It is used to confirm the details of:

- a new contract between the parties
- an amendment to a previously agreed contract
- the cancellation of a contract
- the settlement of a commodity option which has been exercised.

This message may also be exchanged to confirm the liquidation of a forward deal.

In some cases, only one of the financial institutions involved in a contract will send a confirmation to the second financial institution. These cases include:

- retransmission due to errors in a previously sent confirmation
- additional information about a previously confirmed contract, (for example, to provide the name of the party in field 57a and/or 87a, in those cases where the previous confirmation contained the code UNKNOWN).

It may also be used to report the details of a contract to a trade repository.

MT 600 Format Specifications

The format contains four sequences:

- Sequence A Details of the Contract provides the details of the commodity contract.
- Sequence B Commodity Bought provides the settlement information in those cases where the Sender has bought the commodity.
- Sequence C Commodity Sold provides the settlement information in those cases where the Sender has sold the commodity.
- Sequence D Reporting Information provides transaction information that must be reported to a trade repository. This sequence is optional and is only to be used for reporting to trade repositories, although some fields, for example, unique transaction identifier and prior unique transaction identifier, might be used on regular confirmations.

MT 600 Network Validated Rules

- C1** Either sequence B or sequence C, but not both, must be present (Error code(s): C93).
- C2** In the optional sequences and subsequences, the fields with status M must be present if the sequence or subsequence is present, and are otherwise not allowed (Error code(s): C32).
- C3** The currency in the amount fields 33G and 34P or 34R must be the same for all occurrences of these fields in the message (Error code(s): C02).

- C4** The presence of field 77D depends on the value of Type of Agreement (subfield 1 of field 77H) as follows (Error code(s): D36)

Sequence A if subfield 1 of field 77H is ...	Sequence A then field 77D is ...
OTHER	Mandatory
Not = OTHER	Optional

- C5** The use of FOZ, GOZ and TOZ in subfield Unit in sequences B and C, field 32F depends on the commodity in subfield Type in sequence A, field 26C as follows (Error code(s): D07)

Sequence A if Type in field 26C is ...	Sequence B then Unit in field 32F must be ...	Sequence C and Unit in field 32F must be ...
GOLD	Neither GOZ nor TOZ	Neither GOZ nor TOZ
PALL	Neither FOZ nor TOZ	Neither FOZ nor TOZ
PLAT	Neither FOZ nor TOZ	Neither FOZ nor TOZ
SILV	Neither FOZ nor TOZ	Neither FOZ nor TOZ

- C6** In sequence D, field 15D may not be the only field, that is, if field 15D is present, then at least one of the other fields of sequence D must be present (Error code(s): C98).
- C7** In sequence D, when field 17Z is "Y" then 22Q must be present (Error code(s): C56).

MT 600 Usage Rules

- Changes to the quantity of commodity, and/or price per unit, and/or consideration and/or settlement instructions require another confirmation.
- This message handles only the contract part of a commodity trade.

The actual transfer/delivery of commodity is handled through the MT 604 Commodity Transfer/Delivery Order and the confirmation of debits or credits is handled through the MT 606 Commodity Debit Advice/MT 607 Commodity Credit Advice/MT 608 Statement of a Commodity Account. In all cases, the common reference of the MT 600 must be quoted in the relevant reference field (that is, field 21 of the MT 604/606/607 or field 61, subfield 7 of the MT 608).

The actual transfer of funds (that is, the consideration) is handled through the financial institution transfer messages (MT 202/203/205) and the confirmation of debits or credits is handled through the MT 900/910/950. In all cases, the common reference of the MT 600 must be quoted in the relevant reference field (that is, field 21 of the MT 202/203/205/910 or field 61, subfield 7 of the MT 950).

Industry Requirements

- If field 77H specifies ISDA as the type of master agreement, the 2005 ISDA Commodity Definitions (as published by the International Swaps and Derivatives Association, Inc.) (the "Commodity Definitions"),

and the ISDA Benchmarks Supplement, are incorporated into this confirmation unless field 14C states another version of the Commodity Definitions.

- If field 77H specifies ISDA as the type of master agreement and Party A and Party B are parties to an ISDA Master Agreement or an Interest Rate and Currency Exchange Agreement (each an Agreement), this Confirmation constitutes a Confirmation as referred to in, and supplements, forms a part of, and is subject to that Agreement.

If Party A and Party B have not entered into any ISDA Master Agreement or other master agreement, Party A and Party B agree to use all reasonable efforts to promptly negotiate, execute, and deliver an agreement in the form of a 2002 ISDA Master Agreement (the "ISDA Form"), with such modifications as Party A and Party B will in good faith agree. Upon the execution by Party A and Party B of such an agreement, this Confirmation will supplement, form part of, and be subject to that agreement. All provisions contained or incorporated by reference in that agreement upon its execution will govern this Confirmation.

- If some of the standard definitions linked to the agreement specified in field 77H do not apply to the confirmation of a trade under that agreement, a long form confirmation must be sent.

MT 600 Field Specifications

MT 600 - 1. Field 15A: New Sequence

Format

Option A Empty field

Presence

Mandatory in mandatory sequence A

Definition

This field specifies the start of mandatory sequence A Details of the Contract.

Usage Rules

Only the field tag must be present, the field is empty.

MT 600 - 2. Field 20: Transaction Reference Number

Format

16x

Presence

Mandatory in mandatory sequence A

Definition

This field specifies the Sender's reference to the commodity deal.

Network Validated Rules

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

MT 600 - 3. Field 21: Related Reference

Format

16x

Presence

Mandatory in mandatory sequence A

Definition

This field specifies the related reference to the commodity deal.

Network Validated Rules

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

Usage Rules

In a new contract, this field must contain the code NEW.

Where field 22 contains the code EXOPTION, this field must contain the field 20 Transaction Reference Number of the related MT 601 Commodity Option Confirmation.

In all other cases, this field should contain the field 20 Transaction Reference Number of the previous MT 600. The content of field 21, when other than NEW, will normally be a reference meaningful to the Sender rather than the Receiver. This is the case because the Sender will normally include the content of field 20 from the MT 600 or MT 601 previously transmitted rather than received.

MT 600 - 4. Field 22: Code/Common Reference

Format

8a/4!a2!c4!n4!a2!c (Code) (Common Reference)

Presence

Mandatory in mandatory sequence A

Definition

This field identifies the function of the message and contains a reference of the contract common to both the Sender and Receiver.

Codes

Code must contain one of the following codes:

AMEND	Amendment	In confirmations sent by both financial institutions. Confirmation of mutually agreed changes to the quantity of the commodity, and/or price per unit, and/or consideration and/or settlement instructions of a contract for which a confirmation has been previously sent.
CANCEL	Cancellation	In confirmations sent by both financial institutions. Confirmation of the mutually agreed cancellation of a contract.
COMPLETE	Complementary Information	In confirmations sent by one financial institution. Complementary information used to advise for the first time the name of the financial institution in fields 53a, 57a and/or 87a (for example, in those cases where the previous confirmation contained the codes /NOSI/UKWN in field 57J).
CORRECT	Correction	In confirmations sent by one financial institution. Retransmission due to error - sent to correct error(s) in a previously sent MT 600.
EXOPTION	Exercised Option	In confirmations sent by both financial institutions. Confirmation of the mutually agreed settlement of a commodity option which has been exercised.
NEW	New Contract	In confirmations sent by both financial institutions. Confirmation of a new contract.
NOTICE	Notice	In confirmations sent by both financial institutions. Liquidation notice for a forward deal. A notice is optional; its use is dependent on internal practices.

Network Validated Rules

Common Reference consists of two codes, a Sender's code and a Receiver's code, separated by a four-digit number.

The codes are made up from the party prefix and party suffix of the Sender's and Receiver's BICs, that is, their BIC without the country code (Error code(s): T95). These codes must appear in alphabetical order, with letters taking precedence over numbers (Error code(s): T96).

The four-digit number must consist of the rightmost non-zero digit of field 33G in sequence A, preceded by the three digits to the left of it. If there are no digits to the left of it, the space must be zero filled (Error code(s): T22).

MT 600 - 5. Field 94A: Scope of Operation

Format

Option A 4!c (Scope)

Presence

Optional in mandatory sequence A

Definition

This field specifies the role of the Sender and the Receiver of the message in the execution of the confirmed trade.

Codes

One of the following codes must be used (Error code(s): T36):

AGNT	Sender/Receiver is sending/receiving the message on behalf of a third party.
BILA	Bilateral confirmation, that is, the Sender and the Receiver are the principals.
BROK	The confirmation is sent by a money broker.

Usage Rules

The absence of this field means that the Sender and the Receiver are principals, that is, Scope is BILA.

AGNT is used when the confirmation has been sent or received on behalf of a separate legal party and that party has done the deal.

MT 600 - 6. Field 82a: Party A

Format

Option A	[/1!a] [/34x] 4!a2!a2!c [3!c]	(Party Identifier) (Identifier Code)
Option J	5*40x	(Party Identification)

Presence

Mandatory in mandatory sequence A

Definition

This field identifies party A.

Codes

In option J, Party Identification must be specified as a list of pairs (Code)(Value) and one or more of the following codes and formats must be used (Error code(s): T78).

The codes must be placed between slashes ('/').

ABIC	4!a2!a2!c [3!c]	Identifier Code
ACCT	34x	Account number
ADD1	34x	First line of the address
ADD2	34x	Second line of the address
CITY	34x	City, possibly followed by state and country
CLRC	2!a [32x]	Clearing code

LEIC	18!c2!n	Legal Entity Identifier
NAME	34x	Party's name

MT 600 - 9. Field 30: Date Contract Agreed/Amended

Format

6!n (Date)

Presence

Mandatory in mandatory sequence A

Definition

This field contains the date when the contract or amendment to it (for example, code AMEND in field 22) was agreed between the dealers.

Network Validated Rules

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Usage Rules

When CORRECT or COMPLETE is present in field 22, this field specifies the date of the contract or amendment to which this message refers.

MT 600 - 10. Field 26C: Identification of the Commodity

Format

Option C [3!a]/15x/5!a4!a[4x][//8x]

where subfields of option C are:

Subfield	Format	Name
1	[3!a]	(Delivery Details)
2	/15x	(Delivery Location)
3	/5!a	(Allocation)
4	4!a	(Type)

Subfield	Format	Name
5	[4x]	(Denomination)
6	[//8x]	(Form)

Presence

Mandatory (referenced in rule C5) in mandatory sequence A

Definition

This field identifies the commodity bought or sold.

Subfield 4, Type, identifies the commodity or coin.

Codes

Delivery Details must contain one of the following codes (Error code(s): T35):

RHOD	Rhodium
RUTH	Ruthenium
SILV	Silver
STEE	Steel
TINA	Tin
TITA	Titanium
ZINC	Zinc

NEXT VERSION

Usage Rules

When Delivery Details 'OTH' is used, the delivery details must be defined in field 72.

Delivery Location specifies the delivery location of the commodity (for example, LONDON, ZURICH, NEW YORK).

When Type 'OTHR' is used, the commodity must be defined in field 72.

Form specifies the physical form of the commodity.

Example

:26C:/LONDON/ALLOCBRIT1/1

MT 600 - 11. Field 26H: Counterparty's Reference

Format

Option H

16x

Presence

Optional in mandatory sequence A

Definition

This field specifies the counterparty's reference, if known.

MT 600 - 12. Field 33G: Price per Unit

Format

Option G 3!a15d[5!c] (Currency) (Price) (Code)

Presence

Mandatory (referenced in rule C3) in mandatory sequence A

Definition

This field specifies the currency and amount of the price per unit of the agreement and optionally a code indicating a unit of the commodity different from that specified in field 32F.

Codes

Code must contain the following code (Error code(s): T07):

SEE72 Indicates that more information can be found in field 72

Network Validated Rules

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Price must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40, T43).

Usage Rules

When the price per unit of the agreement is based on a unit different from the unit specified in field 32F Quantity of the Commodity, Price must be converted based on the unit used in field 32F, and the code SEE72 must appear in Code (that is, [5!c]) with the conversion explained in field 72.

The number of digits following the decimal comma will not be validated.

MT 600 - 13. Field 71C: Details of Adjustments

Format

Option C 6*35x (Narrative)

which may be formatted as:

Line 1 /4c/29x (Code) (Narrative)

Lines 2-6 35x (Narrative)

Presence

Optional in mandatory sequence A

Definition

This field specifies details of adjustments, for example, commission to the price stated in field 33G, if applicable.

Codes

Code may contain one or more of the following codes:

BROK	Brokerage
CHGS	Charges
COMM	Commission
FEES	Fees
MISC	Miscellaneous
POST	Postage
SHIN	Shipping including insurance
STMP	Stamp Duty
TTAX	Transaction Tax
VTAX	Value added Tax
WITX	Withholding Tax

Usage Rules

All adjustments must be expressed in the same currency as the amounts stated in fields 33G and 34P or 34R.

MT 600 - 14. Field 77H: Type, Date, Version of the Agreement

Format

Option H 6a[/8!n] [/4!n] (Type) (Date) (Version)

Presence

Mandatory (referenced in rule C4) in mandatory sequence A

Definition

This field specifies the type of the agreement covering the transaction. It is followed by the date on which the agreement was signed and the version of the agreement.

Codes

Type must be specified using one of the following codes (Error code(s): T47)

ISDA	ISDA Master Agreement
OTHER	Another type of bilateral agreement signed up front between party A and party B. The agreement must be specified in field 77D.

Network Validated Rules

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

The presence of field 77D depends on the value of Type of Agreement (subfield 1 of field 77H) as per Network Validation Rule C4 (Error code(s): D36).

Version must be a valid year expressed YYYY. It must not consist entirely of zeros (Error code(s): T50).

Usage Rules

The code OTHER must not be used in the case of an ISDA Master Agreement.

In an ISDA agreement, the absence of the second and third subfield means either that the information is not available or that the agreement is under negotiation.

MT 600 - 15. Field 77D: Terms and Conditions

Format

Option D 6*35x (Narrative)

Presence

Conditional (see rule C4) in mandatory sequence A

Definition

This field contains additional information concerning the terms and conditions of the underlying agreement.

Network Validated Rules

The presence of field 77D depends on the value of Type of Agreement (subfield 1 of field 77H) as per Network Validation Rule C4 (Error code(s): D36).

Usage Rules

This field should be used in trades where the Master Agreement is not ISDA.

MT 600 - 16. Field 14C: Year of Definitions

Format

Option C 4!n (Year)

Presence

Optional in mandatory sequence A

Definition

This field specifies the year of the version of the Agreement's definitions applicable to the MT 600 Commodity Trade Confirmation.

If an ISDA Master Agreement applies, that is, the Master Agreement (Type in field 77H) is equal to ISDA, this field specifies the year of the ISDA Terms and Definitions.

Usage Rules

This field contains the identification of a Year expressed as YYYY or the value '0000'.

If the Master Agreement (Type in field 77H) is ISDA, this field must be used and understood as follows:

- Year contains the value 1997: "The definitions and provisions contained in the 1997 ISDA Bullion Definitions (as published by the International Swap and Derivatives Association, Inc.) (the Definitions) are incorporated into this confirmation".
- Year contains the value 2005: "The definitions and provisions contained in the 2005 ISDA Commodity Definitions (as published by the International Swaps and Derivatives Association, Inc.) (the "Definitions"), and the ISDA Benchmarks Supplement, are incorporated into this Confirmation".

If the Master Agreement (Type in field 77H) is OTHER, the value of this field depends on the Agreement.

MT 600 - 17. Field 72: Sender to Receiver Information

Format

6*35x (Narrative)

In addition to narrative text, structured text with the following line formats may be used:

Line 1	/8c/[additional information]	(Code) (Narrative)
Lines 2-6	[//continuation of additional information] or [/8c/[additional information]]	(Narrative) or (Code) (Narrative)

Presence

Optional in mandatory sequence A

Definition

This field specifies additional information for the Receiver.

Codes

One or more of the following codes may be used in Code, if required:

BROKER	Identification of the broker negotiating the contract on behalf of one of the parties.
ELEC	Indicates that the deal has been arranged via an electronic means. The code can be followed by an indication of the specific electronic means used for arranging the deal.
INTERMDY	Specifies the intermediary institution for the settlement of the commodity.

PHON	The deal was arranged by telephone.
TELEX	The deal was arranged by telex.
TIME	The time at which the transaction was executed.
VENU	The venue where the transaction was executed.

Network Validated Rules

Code must not be UTI, PUTI, USI or PUSI (Error code(s): T49).

Usage Rules

Each code must be between slashes and must appear at the beginning of a line. All alphabetic characters must be in upper case.

Additional explanatory information, which may continue on the next line, must be preceded by double slashes "//".

Example

:72:/PHON/

MT 600 - 18. Field 15B: New Sequence

Format

Option B Empty field

Presence

Mandatory in conditional (see rule C1) sequence B

Definition

This field specifies the start of conditional sequence B Commodity Bought.

Usage Rules

This field may only be used when at least one other field in the optional sequence B is present and is otherwise not allowed.

Only the field tag must be present, the field is empty.

MT 600 - 19. Field 32F: Quantity of the Commodity

Format

Option F 3!a15d (Unit) (Amount)

Presence

Mandatory (referenced in rule C5) in conditional (see rule C1) sequence B

Definition

This field specifies the type of unit and the quantity of the commodity bought by the Sender.

Codes

Unit must contain one of the following codes (Error code(s): T06):

FOZ	Fine Troy Ounce
GOZ	Gross Ounce
GRM	Gramme
KLO	Kilo
LIT	Litre
LOT	Lot
OTH	Other
PND	Pound
TAL	Tael
TOL	Tola
TON	Metric Tonne
TOZ	Troy Ounce
UNT	Unit

Network Validated Rules

Amount must not contain more than six digits following the decimal comma (Error code(s): C89).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40, T43).

Usage Rules

When Unit 'OTH' is used, the unit of the commodity must be defined in field 72.

Example

:32F:GOZ500,

MT 600 - 20. Field 86a: Intermediary

Format

Option A	[/1!a] [/34x] 4!a2!a2!c [3!c]	(Party Identifier) (Identifier Code)
Option B	[/1!a] [/34x] [35x]	(Party Identifier) (Location)

Option D	[/1!a] [/34x] 4*35x	(Party Identifier) (Name and Address)
----------	------------------------	--

Presence

Optional in conditional (see rule C1) sequence B

Definition

This field identifies the intermediary institution for the delivery of the commodity bought.

Network Validated Rules

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

Usage Rules

For matching purposes, option A must be used when available.

MT 600 - 21. Field 87a: Receiver of the Commodity

Format

Option A	[/1!a] [/34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option B	[/1!a] [/34x] [35x]	(Party Identifier) (Location)
Option D	[/1!a] [/34x] 4*35x	(Party Identifier) (Name and Address)

Presence

Mandatory in conditional (see rule C1) sequence B

Definition

This field identifies the party at which the Sender will receive the commodity bought.

Network Validated Rules

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

Usage Rules

When the Receiver services a commodity account (that is, an account for the commodity specified in field 26C) for the Sender, and this account is to be credited, option A should be used and the field must contain the Receiver's BIC.

When the Sender services a commodity account (that is, an account for the commodity specified in field 26C) for the Receiver and this account is to be debited, option A should be used and the field must contain the Sender's BIC.

In forward contracts, if the receiver of the commodity is not known, the code UNKNOWN must appear in this field, using option D.

MT 600 - 22. Field 34P: Consideration

Format

Option P 6!n3!a15d (Date) (Currency) (Amount)

Presence

Mandatory (referenced in rule C3) in conditional (see rule C1) sequence B

Definition

This field specifies the value date, currency code and the consideration paid by the Sender.

Network Validated Rules

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum allowed for that specified currency (Error code(s): C03, T40, T43).

Usage Rules

The consideration is calculated by multiplying the quantity of commodity (that is, the amount stated in field 32F) by the price per unit (that is, the amount stated in field 33G), and, if applicable, adjusted for any amounts stated in field 71C.

MT 600 - 23. Field 53a: Sender's Correspondent

Format

Option A [/1!a][/34x] (Party Identifier)
 4!a2!a2!c[3!c] (Identifier Code)

Option J 5*40x (Party Identification)

Presence

Optional in conditional (see rule C1) sequence B

Definition

This field identifies the financial institution from which the Sender will transfer the funds specified in field 34P.

Codes

In option J, Party Identification must be specified as a list of pairs (Code)(Value) and one or more of the following codes and formats must be used (Error code(s): T78).

The codes must be placed between slashes ('/').

ABIC	4!a2!a2!c[3!c]	Identifier Code
ACCT	34x	Account number
ADD1	34x	First line of the address
ADD2	34x	Second line of the address

Option A	[/1!a] [/34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option J	5*40x	(Party Identification)

Presence

Mandatory in conditional (see rule C1) sequence B

Definition

This field identifies the financial institution and account where the Receiver wants to receive the funds specified in field 34P.

Codes

In option J, Party Identification must be specified as a list of pairs (Code)(Value) and one or more of the following codes and formats must be used (Error code(s): T78).

The codes must be placed between slashes ('/').

ABIC	4!a2!a2!c[3!c]	Identifier Code
------	----------------	-----------------

ACCT	34x	Account number
ADD1	34x	First line of the address
ADD2	34x	Second line of the address
CITY	34x	City, possibly followed by state and country
CLRC	2!a[32x]	Clearing code
LEIC	18!c2!n	Legal Entity Identifier
NAME	34x	Party's name
NOSI	4!a	No settlement instructions
TXID	34x	Tax identification code

Network Validated Rules

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

In option J, ABIC must not be the only code present in the field (Error code(s): T79).

If code NOSI is present in option J, it must be followed by one of these codes (Error code(s): D26):

CLRD	Cleared	The trade will be cleared through a CCP.
NETS	Netted	Payment flows are netted based on a bilateral or other agreement.
NONE	No Settlement	The trade will not be settled.
SSIS	Standing Settlement Instructions	Standing settlement instructions are to be used.
UKWN	Unknown	Settlement details are unknown.

Usage Rules

When the optional Party Identifier is present, it identifies the account which is to be debited or credited on the books of the account with institution which is specified.

When the Sender services an account for the Receiver in the relevant currency, and this account is to be credited, option A should be used and the field must contain the Sender's BIC.

When the Receiver services an account for the Sender in the relevant currency, and this account is to be debited, option A should be used and the field must contain the Receiver's BIC.

In forward contracts, if the account with institution is not known, the code /NOSI/UKWN must appear in this field, using option J.

If CLRC is present in field option J, it must be followed either by a national clearing system code from the list below or by a bilaterally agreed two-character code:

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code

Codes

One of the following codes may be used:

CNPSCA	Commodity Metals Non Precious Swap Cash
CNPSFP	Commodity Metals Non Precious Spot Forward Physical

Usage Rules

These product codes must be in line with the ISDA Product Taxonomy.

MT 600 - 45. Field 35B: Identification of Financial Instrument

Format

Option B	[ISIN!e12!c] [4*35x]	(Identification of Instrument) (Description of Instrument)
----------	-------------------------	---

Presence

Optional in optional sequence D

Definition

The ISIN or other identifier for the instrument that was traded.

Network Validated Rules

At least Identification of Instrument or Description of Instrument must be present; both may be present (Error code(s): T17).

Identification of Instrument must start with the code ISIN (Error code(s): T12).

Usage Rules

Certain derivative trades must be assigned an ISIN for regulatory purposes. This field can be used to notify the Receiver of this ISIN.

An alternative identifier may be included in Description of Instrument, in addition to, or instead of an ISIN.

If bilaterally agreed codes are used in Description of Instrument, then they must be placed between slashes '/'.

MT 600 - 46. Field 17H: Allocation Indicator

Format

Option H	1!a	(Indicator)
----------	-----	-------------

Presence

Optional in optional sequence D

Definition

This field specifies whether the trade is a post-allocation or a pre-allocation trade, or whether the trade is unallocated.

Codes

The following codes must be used (Error code(s): T67):

A	Post-allocation
P	Pre-allocation
U	Unallocated

Presence

Optional in optional sequence D

Definition

This field specifies the date and time of the execution of the transaction in Coordinated Universal Time (UTC).

Network Validated Rules

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

Time must be a valid time expressed as HHMMSS (Error code(s): T38).

UTC Indicator must be a valid time expressed as HH[MM] (Error code(s): T39).

Sign ([N]) must not be used when UTC Indicator is equal to all zeroes (Error code(s): T14).

MT 600 - 50. Field 17W: Non Standard Flag

Format

Option W 1!a (Flag)

Presence

Optional in optional sequence D

Definition

This field specifies whether the reportable transaction has one or more additional terms or provisions, other than those listed in the required real-time data fields, that materially affects the price of the reportable transaction.

Codes

The following code must be used (Error code(s): T36):

Y The transaction is non-standard.

Usage Rules

This field is only to be used for reporting to trade repositories.

This field is only to be used in the case the transaction is non-standard as per the definition above.

Format

Option Y 1!a (Indicator)

Presence

Optional in optional sequence D

Definition

This indicator specifies the financial nature of the reporting counterparty.

Codes

Indicator must contain one of the following codes (Error code(s): T67):

F	The party is a financial counterparty
N	The party is a non-financial counterparty

MT 600 - 52. Field 17Z: Collateral Portfolio Indicator

Format

Option Z 1!a (Indicator)

Presence

Optional (referenced in rule C7) in optional sequence D

Definition

This indicator specifies if the collateral is posted on a portfolio basis.

Codes

Indicator must contain one of the following codes (Error code(s): T36):

N	The collateral is posted on a trade by trade basis
Y	The collateral is posted at a portfolio level

MT 600 - 53. Field 22Q: Collateral Portfolio Code

Format

Option Q 10x (Portfolio)

Presence

Conditional (see rule C7) in optional sequence D

Definition

The field identifies the portfolio code to which the trade belongs if the collateral is posted on a portfolio basis (and not trade by trade).

Usage Rules

This field should be used when the Collateral Portfolio Indicator is "Y".

U UCITS and its management company, authorised in accordance with Directive 2009/65/EC.

Usage Rules

These codes are as defined by ESMA.

MT 600 - 56. Field 17Q: Trade with Non-EEA Counterparty Indicator

Format

Option Q 1!a (Indicator)

Presence

Optional in optional sequence D

Definition

This field specifies whether the counterparty has entered into a trade with a non-EEA counterparty that is not subject to the reporting obligation.

Codes

Indicator must contain one of the following codes (Error code(s): T36):

N No, the counterparty is domiciled inside the EEA.

Network Validated Rules

Currency/Percent must be a valid ISO 4217 currency code or the code PCT (Error code(s): T52).

The integer part of Amount/Rate must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

If Amount/Rate is zero, Sign must not be present (Error code(s): T14).

Usage Rules

This field is used to report details of fees, expenses and commissions. This field is not intended to be used to instruct separate settlement of these charges, as this is typically incorporated within other settlement fields in the message.

The field may be repeated, in order to provide a breakdown of charges. The code TOTL may be used on its own, or in addition to other codes, to report the total charges related to the trade.

If a charge is negative, Sign must be present.

MT 601 Commodity Option Confirmation

MT 601 Scope

This message type is exchanged by or on behalf of the institutions or corporates, party A and party B, which have agreed to a commodity option contract. This message is also used when one of the parties is a fund manager.

It is used to confirm the details of

- a new contract between the parties
- an amendment to a previously agreed contract
- the cancellation of a contract
- the surrender of an option by the buyer (holder) to the seller (grantor) for compensation.

In some cases, only one of the financial institutions involved in a contract will send a confirmation to the second financial institution. These cases include:

- retransmission due to errors in a previously sent confirmation
- additional information about a previously confirmed contract.

It may also be used to report the details of a contract to a trade repository.

MT 601 Format Specifications

The format contains two sequences:

- Sequence A General Information provides the details of the option confirmation.
- Sequence B Reporting Information provides transaction information that must be reported to a trade repository. This sequence is optional and is only to be used for reporting to trade repositories, although some fields, for example, unique transaction identifier and prior unique transaction identifier, might be used on regular confirmations.

MT 601 Network Validated Rules

- C1** Field 53a may only be present if field 34P is used (Error code(s): C20).
- C2** Field 31C may only be present in the case of an American style option (that is, subfield 3 of field 23 contains 'A') (Error code(s): C79).
- C3** The presence of field 77D depends on the value of Type of Agreement (subfield 1 of field 77H) as follows (Error code(s): D36).

If subfield 1 of field 77H is ...	Then field 77D is ...
OTHER	Mandatory
Not = OTHER	Optional

- C4** The use of FOZ, GOZ and TOZ in subfield Unit in sequence A, field 32F depends on the commodity in subfield Type in sequence A, field 26C as follows (Error code(s): D07)

Sequence A if Type in field 26C is ...	Sequence A then Unit in field 32F must be ...
GOLD	Neither GOZ nor TOZ
PALL	Neither FOZ nor TOZ
PLAT	Neither FOZ nor TOZ
SILV	Neither FOZ nor TOZ

- C5** In sequence B, field 15B may not be the only field, that is, if field 15B is present, then at least one of the other fields of sequence B must be present (Error code(s): C98).

C6 In all optional sequences and subsequences, the fields with status M must be present if the sequence or subsequence is present, and are otherwise not allowed (Error code(s): C32).

C7 In sequence B, when field 17Z is "Y" then 22Q must be present (Error code(s): C56).

MT 601 Usage Rules

- Changes to the quantity of the commodity, and/or strike price, and/or premium price, and/or exercise date, and/or settlement instructions require another confirmation.
- This message type handles only the contract part of the commodity option.
- In those cases where the message is exchanged to confirm a new contract, or an amendment, cancellation or close out of a previously agreed contract, the content of the confirmations should be identical, and is used to confirm information already known to the two parties. Careful verification of the exchanged messages is, of course, required.
- A commodity option may be exercised by the buyer. To confirm the settlement of the exercise of a commodity option, an MT 600 Commodity Trade Confirmation may be used, with the function code EXOPTION in field 22 and field 21 containing the TRN of the related MT 601.

Industry Requirements

- If field 77H specifies ISDA as the type of master agreement, the 2005 ISDA Commodity Definitions (as published by the International Swaps and Derivatives Association, Inc.) (the "Commodity Definitions"), and the ISDA Benchmarks Supplement, are incorporated into this confirmation unless field 14C states another version of the Commodity Definitions.
- If field 77H specifies ISDA as the type of master agreement and Party A and Party B are parties to an ISDA Master Agreement or an Interest Rate and Currency Exchange Agreement (each an Agreement), this Confirmation constitutes a Confirmation as referred to in, and supplements, forms a part of, and is subject to that Agreement.

If Party A and Party B have not entered into any ISDA Master Agreement or other master agreement, Party A and Party B agree to use all reasonable efforts to promptly negotiate, execute, and deliver an agreement in the form of a 2002 ISDA Master Agreement (the "ISDA Form"), with such modifications as Party A and Party B will in good faith agree. Upon the execution by Party A and Party B of such an agreement, this Confirmation will supplement, form part of, and be subject to that agreement. All provisions contained or incorporated by reference in that agreement upon its execution will govern this Confirmation.

- If some of the standard definitions linked to the agreement specified in field 77H do not apply to the confirmation of a trade under that agreement, a long form confirmation must be sent.

Usage Rules

Only the field tag must be present, the field is empty.

MT 601 - 2. Field 20: Transaction Reference Number

Format

16x

Presence

Mandatory in mandatory sequence A

Definition

This field specifies the Sender's reference to the commodity deal.

Network Validated Rules

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

MT 601 - 3. Field 21: Related Reference

Format

16x

Presence

Mandatory in mandatory sequence A

Definition

This field specifies the related reference to the commodity deal.

Network Validated Rules

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

Usage Rules

When this message is a confirmation of a new contract, the code NEW must be used.

In all other cases, this field must contain the field 20 TRN of the previous MT 601.

The content of field 21, when other than NEW, will normally be a reference meaningful to the Sender rather than the Receiver. This is because the Sender will normally include the content of field 20 from the MT 601 previously transmitted rather than received.

MT 601 - 4. Field 22: Code/Common Reference

Format

8a/4!a2!c4!n4!a2!c (Code) (Common Reference)

Presence

Mandatory in mandatory sequence A

Definition

This field identifies the function of the message and contains the reference of the contract common to both the Sender and Receiver.

Codes

Code must contain one of the following codes:

AMEND	Amendment	In confirmations sent by both financial institutions. Confirmation of mutually agreed changes to the quantity of the commodity, and/or strike price, and/or premium price and/or exercise date and/or settlement information of the contract for which a confirmation message has been previously sent.
CANCEL	Cancellation	In confirmations sent by both financial institutions. Confirmation of the mutually agreed cancellation of a contract.
CLOSEOUT	Close Out	In confirmations sent by both financial institutions. Confirmation of the mutually agreed surrender of the option by the buyer (holder) to the seller (grantor) for compensation.
COMPLETE	Complementary Information	In confirmations sent by one financial institution. Complementary information used to advise for the first time the name of the financial institution in field 53a and/or 57a (for example, in those cases where the previous confirmation contained the codes /NOSI/UKWN in field 57J).
CORRECT	Correction	In confirmations sent by one financial institution. Retransmission due to error - to correct error(s) in a previously sent MT 601.
NEW	New Contract	In confirmations sent by both financial institutions. Confirmation of a new commodity option.

Network Validated Rules

Common Reference consists of two codes, a Sender's code and a Receiver's code, separated by a four-digit number.

The codes are made up from the party prefix and party suffix of the Sender's and Receiver's BICs, that is, their BIC without the country code (Error code(s): T95). These codes must appear in alphabetical order, with letters taking precedence over numbers (Error code(s): T96).

The four-digit number must consist of the rightmost non-zero digit of field 32B in sequence A, preceded by the three digits to the left of it. If there are no digits to the left of it, the space must be zero filled (Error code(s): T22).

MT 601 - 5. Field 94A: Scope of Operation

Format

Option A 4!c (Scope)

Presence

Optional in mandatory sequence A

Definition

This field specifies the role of the Sender and the Receiver of the message in the execution of the confirmed trade.

Codes

One of the following codes must be used (Error code(s): T36):

AGNT	Sender/Receiver is sending/receiving the message on behalf of a third party.
BILA	Bilateral confirmation, that is, the Sender and the Receiver are the principals.
BROK	The confirmation is sent by a money broker.

Usage Rules

The absence of this field means that the Sender and the Receiver are principals, that is, Scope is BILA. AGNT is used when the confirmation has been sent or received on behalf of a separate legal party and that party has done the deal.

MT 601 - 6. Field 82a: Party A

MT 601 - 23. Field 77H: Type, Date, Version of the Agreement

Format

Option H 6a[/8!n][/4!n] (Type) (Date) (Version)

Presence

Mandatory (referenced in rule C3) in mandatory sequence A

Definition

This field specifies the type of the Agreement covering the transaction. It is followed by the date on which the Agreement was signed and the version of the Agreement.

Codes

Type must be specified using one of the following codes (Error code(s): T47):

ISDA ISDA Master Agreement

OTHER Another type of bilateral agreement signed up front between party A and party B. The agreement must be specified in field 77D.

Network Validated Rules

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

The presence of field 77D depends on the value of Type of Agreement (subfield 1 of field 77H) as per Network Validation Rule C4 (Error code(s): D36).

Version must be a valid year expressed YYYY. It must not consist entirely of zeros (Error code(s): T50).

Usage Rules

The code OTHER must not be used in the case of an ISDA Master Agreement.

In an ISDA agreement, the absence of the second and third subfield means either that the information is not available or that the agreement is under negotiation.

MT 601 - 24. Field 77D: Terms and Conditions

Format

Option D 6*35x (Narrative)

Presence

Conditional (see rule C3) in mandatory sequence A

Definition

This field contains additional information concerning the terms and conditions of the underlying agreement.

Network Validated Rules

The presence of field 77D depends on the value of Type of Agreement (subfield 1 of field 77H) as per Network Validation Rule C4 (Error code(s): D36).

Usage Rules

This field should be used in trades where the Master Agreement is not ISDA.

MT 601 - 25. Field 14C: Year of Definitions

Format

Option C 4!n (Year)

Presence

Optional in mandatory sequence A

Definition

This field specifies the year of the version of the Agreement's definitions applicable to the MT601 Commodity Option Confirmation.

If an ISDA Master Agreement applies, that is, the Master Agreement (Type in field 77H) is equal to ISDA, this field specifies the year of the ISDA Terms and Definitions.

Usage Rules

This field contains the identification of a Year expressed as YYYY or the value '0000'.

If the Master Agreement (Type in field 77H) is ISDA, this field must be used and understood as follows:

- Year contains the value 1997: "The definitions and provisions contained in the 1997 ISDA Bullion Definitions (as published by the International Swap and Derivatives Association, Inc.) (the "Definitions") are incorporated into this confirmation".
- Year contains the value 2005: "The definitions and provisions contained in the 2005 ISDA Commodity Definitions (as published by the International Swaps and Derivatives Association, Inc.) (the "Definitions"), and the ISDA Benchmarks Supplement, are incorporated into this Confirmation".

If the Master Agreement (Type in field 77H) is OTHER, the value of this field depends on the Agreement.

MT 601 - 26. Field 72: Sender to Receiver Information

Format

6*35x (Narrative)

In addition to narrative text, structured text with the following line formats may be used:

Line 1	/8c/[additional information]	(Code) (Narrative)
Lines 2-6	[//continuation of additional information]	(Narrative)
	or	(Code) (Narrative)
	[/8c/[additional information]]	

Presence

Optional in mandatory sequence A

Definition

This field specifies additional information for the Receiver.

Codes

One or more of the following codes may be used in Code, if required:

BROKER	Identification of the broker negotiating the contract on behalf of one of the parties.
ELEC	Indicates that the deal has been arranged via an electronic means. The code can be followed by an indication of the specific electronic means used for arranging the deal.
PHON	The deal was arranged by telephone.
TELEX	The deal was arranged by telex.
TIME	The time at which the transaction was executed.
VENU	The venue where the transaction was executed.

Network Validated Rules

Code must not be UTI, PUTI, USI or PUSI (Error code(s): T49).

Usage Rules

Each code must be between slashes and must appear at the beginning of a line. All alphabetic characters must be in upper case.

Additional explanatory information, which may continue on the next line, must be preceded by double slashes "//".

MT 601 - 27. Field 15B: New Sequence

Format

Option B Empty field

Presence

Mandatory in optional sequence B

Definition

This field specifies the start of optional sequence B Reporting Information.

Usage Rules

Only the field tag must be present, the field is empty.

This sequence is only to be used for reporting to trade repositories, although some fields, for example, unique transaction identifier and prior unique transaction identifier, might be used on regular confirmations.

MT 601 - 28. Field 22L: Reporting Jurisdiction

Format

Option L 35x (Reporting Jurisdiction)

Presence

Mandatory in optional subsequence B1

Definition

This field specifies the supervisory party to which the trade needs to be reported.

Option M	30x	(Namespace)
----------	-----	-------------

Presence

Mandatory in optional subsequence B1a

Definition

This field specifies a unique code that identifies the registered entity creating the unique transaction identifier.

Usage Rules

Industry practices will have to be followed for determining the namespace.

MT 601 - 31. Field 22N: Transaction Identifier

Format

Option N 32x

Presence

Mandatory in optional subsequence B1a

Definition

This field specifies - in combination with the namespace - the unique transaction identifier to be created at the time a transaction is first executed, shared with all registered entities and counterparties involved in the transaction, and used to track that particular transaction over its life.

Usage Rules

Industry practices have to be followed for the creation of the Unique Transaction Identifier (UTI). The UTI is a combination of Namespace and Transaction Identifier.

The UTI is also called USI (Unique SWAP Identifier).

MT 601 - 32. Field 22P: PUTI Namespace/Issuer Code

Format

Option P 30x (Namespace)

Presence

Mandatory in optional subsequence B1a1

MT 608 Statement of a Commodity Account

MT 608 Scope

This message is sent by a commodity account servicing institution to the commodity account owner or its authorised agent.

It is used to advise the Receiver of transactions booked to a commodity account.

This statement message contains all bookings present in the account, whether caused by a message received via SWIFT or by some other means.

MT 608 Network Validated Rules

- C1** The Unit must be the same for all occurrences of fields 60a, 62a, 64 and 65 in the message (Error code(s): C80).
- C2** The use of FOZ, GOZ and TOZ in subfield Unit in fields 60a, 62a, 64, and 65 depends on the commodity in subfield Type in field 26C as follows (Error code(s): D07)

GOLD	Neither GOZ nor TOZ
PALL	Neither FOZ nor TOZ
PLAT	Neither FOZ nor TOZ
SILV	Neither FOZ nor TOZ

MT 608 Usage Rules

- While it may be the ultimate goal to have full identification for all bookings, this is currently not always practicable for bookings from non-SWIFT transactions. A four character code is provided, however, for classification according to the nature of such non-SWIFT transactions.
- Each statement message carries an opening and a closing balance, as well as its sequence number in field 28 Statement Number/Page Number. The book entry itself is contained in a field 61 Statement Line. The last message in a multiple message statement is identified by the closing balance in field 62a Closing Balance showing the tag letter 'F'.
- Since a SWIFT message is restricted to the maximum input message length, it is possible that several messages ('pages') may be needed to accommodate all the information. In these instances, each message should be identified as to its sequence in the total number.
- To facilitate manual reconciliation, it is recommended that statement entries be sorted by debits and credits and these by value date in ascending amounts.

Codes

When Type identifies a commodity, one of the following codes must be used (Error code(s): T04):

ALUM	Aluminium
COPP	Copper
GOLD	Gold
IRID	Iridium
LEAD	Lead
NICK	Nickel
OSMI	Osmium
OTHR	Other
PALL	Palladium
PLAT	Platinum
POIL	Palm Oil
RHOD	Rhodium
RUTH	Ruthenium
SILV	Silver
STEE	Steel

TINA	Tin
TITA	Titanium
ZINC	Zinc

Usage Rules

When Delivery Details 'OTH' is used, the delivery details must be defined in field 25.

Delivery Location specifies the delivery location of the commodity (for example, LONDON, ZURICH, NEW YORK).

When Type 'OTHR' is used, the commodity must be defined in field 25.

Form specifies the physical form of the commodity.

Example

:26C:/LONDON/ALLOCBRIT1/1

MT 608 - 3. Field 25: Further Account Identification

Format

35x

Presence

Optional

Definition

This field contains further identification information about the commodity account to which this statement relates.

MT 608 - 4. Field 28: Statement Number/Sequence Number

Format

5n[/2n] (Statement Number) (Sequence Number)

Presence

Mandatory

Definition

This field contains the sequential number of the statement followed by the sequence number of the message within that statement.

Example

For the first message of a statement the content is 235/01, for the second message it is 235/02, etc.

MT 608 - 5. Field 60a: Opening Balance

Format

Option F 1!a6!n3!a15d (D/C Mark) (Date) (Unit) (Amount)

Option M 1!a6!n3!a15d (D/C Mark) (Date) (Unit) (Amount)

Presence

Mandatory (referenced in rules C1 and C2)

Definition

This field specifies, for the (intermediate) opening balance, whether it is a debit or credit balance, the date, the unit of the commodity and amount of the balance.

Codes

In option F or M, D/C Mark must contain one of the following codes (Error code(s): T51):

- C The (intermediate) opening balance is a credit balance
- D The (intermediate) opening balance is a debit balance

Codes

In option F or M, Unit must contain one of the following codes (Error code(s): T06):

- FOZ Fine Troy Ounce
- GOZ Gross Ounce
- GRM Gramme
- KLO Kilo
- LIT Litre
- LOT Lot
- OTH Other
- PND Pound
- TAL Tael
- TOL Tola
- TON Metric Tonne
- TOZ Troy Ounce
- UNT Unit

Network Validated Rules

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Amount must not contain more than six digits following the decimal comma (Error code(s): C89).

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40, T43).

Usage Rules

This field must always be the same as field 62a (closing balance) of the previous statement message for this account.

The first statement message for a specified period must contain field 60F (first opening balance); additional statement messages for the same statement period must contain field 60M (intermediate opening balance).

When Unit 'OTH' is used, the unit of the commodity must be defined in field 25.

9	 [34x]	 <crf>(Supplementary Details)

Presence

Optional

Definition

This field contains the details of each transaction.

Subfield 1 Date, is the date on which the debit/credit is effective.

Subfield 2 Entry Date, is the date on which the transaction is booked to the account.

Subfield 3 Debit/Credit Mark, see description in the Codes section.

Subfield 4 Funds Code, is the 3rd character of the currency code, if needed.

Subfield 5 Amount, is the amount of the transaction.

Subfield 6 Transaction Type and Identification Code, see description in the Codes section.

Subfield 7 Reference for the Account Owner, is the reference of the message (SWIFT or any other) or document that resulted in this entry. This is a reference that the account owner can use to identify the reason for the entry. See further details in the Usage Rules section.

Subfield 8 Reference of the Account Servicing Institution, is the reference of the advice or instruction sent by the account servicing institution to the account owner. See further details in the Usage Rules section.

Subfield 9 Supplementary Details, see details in the Usage Rules section.

Codes

Subfield 3, Debit/Credit Mark must contain one of the following codes (Error code(s): T51):

C	Credit
D	Debit

Codes

In subfield 6, Transaction Type must contain one of the following codes (Error code(s): T53):

S	SWIFT transfer	For entries related to SWIFT transfer instructions and subsequent charge messages.
N	Non-SWIFT transfer	For entries related to payment and transfer instructions, including related charges messages, not sent through SWIFT or where an alpha description is preferred.
F	First advice	For entries being first advised by the statement (items originated by the account servicing institution).

Codes

In subfield 6, when Transaction Type is 'N' or 'F', Identification Code may contain one of the following codes:

BRF	Brokerage Fee
CHG	Charges and Other Expenses
COM	Commission
DIV	Dividends-Warrants
EQA	Equivalent Amount
INT	Interest

MSC	Miscellaneous
PCH	Purchase
RTI	Returned Item
SAL	Sale
STO	Standing Order
TRF	Transfer
VDA	Value Date Adjustment (used with an entry made to withdraw an incorrectly dated entry - it will be followed by the correct entry with the relevant code)

Codes

In subfield 6, when Transaction Type is 'S', Identification Code will indicate the message type of the SWIFT message causing the entry (for debit entries) or the message type of the SWIFT message used to advise the account owner (for credit entries). It must be a number (format 3!n) in the range 100-999 (Error code(s): T18).

Network Validated Rules

Subfield 1, Date, must be a valid date expressed as YYMMDD (Error code(s): T50).

The SWIFT System validates subfield 2, Entry Date (date in reduced ISO form), using current system year (Error code(s): T50).

Subfield 4, Funds Code, must not be used in this message (Error code(s): C91).

The integer part of subfield 5, Amount, must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40, T43).

Subfield 5, Amount, must not contain more than six digits following the decimal comma (Error code(s): C89).

Usage Rules

This field may be repeated within the constraints of the maximum input message length.

Subfield 2, Entry Date, is normally only used when different from the value date.

The following rules apply to subfield 7, Reference for the Account Owner:

- At least one valid character other than a blank must be present.
- For debit entries, the purpose of this subfield is to identify, to the account owner, the instruction which caused the debit. Therefore, the content of this subfield is the field 20 Sender's Transaction Reference Number (or its equivalent) of the original instruction.
- Credit entries may be the result of one of the following situations:
 1. The account servicing institution is identifying, to the account owner the receipt of funds for its account as a result of a related transaction. In this case, the content of subfield 7, Reference for the Account Owner, is the reference for the beneficiary (for example, field 21 Related Reference) of the related transaction.
 2. The account servicing institution has issued a payment instruction to the account owner and the credit identified in this subfield is for that payment. The content of Reference for the Account Owner is the field 20 Transaction Reference Number (or its equivalent) of the payment instruction issued by the account servicing institution.

- If no reference is available for this subfield, the code NONREF shall be used. The account servicing institution must then supply, in subfield 9, Supplementary Details, what it considers to be the best alternative information.
- This reference must be quoted in all cases when available. In cases where a transaction passes through several financial institutions, the original reference must always be forwarded.
- This reference must always be quoted against any charges or fees debited by the account servicing institution.
- Debits against standing instructions must show the reference of the standing instruction.
- In cases where a mutually agreed alternative reference exists (for example, in foreign exchange or money market transactions), this reference should then be used.
- If the statement entry concerns a cheque, the cheque number should be indicated in this subfield.

The following rules apply to subfield 8, Reference of the Account Servicing Institution:

- The content of this subfield is the account servicing institution's own reference for the transaction.
- When the transaction has been initiated by the account servicing institution, this reference may be identical to subfield 7, Reference for the Account Owner. If this is the case, Reference of the Account Servicing Institution, subfield 8 may be omitted.

The following rules apply to subfield 9, Supplementary Details:

- When no reference for the account owner is available, that is, subfield 7, Reference for the Account Owner, contains NONREF, the account servicing institution should provide the best available alternative information in this subfield.
- Supplementary details may be provided when an advice has not been sent for a transaction, or to provide additional information to facilitate reconciliation.

The integer part of Amount must contain at least one digit. The decimal comma ',' is mandatory and is included in the maximum length (Error code(s): T40, T43).

Usage Rules

The contents of this field will be repeated in field 60a of the subsequent statement message for this account.

If there is only one statement message transmitted for the period, this field must use tag option F, that is, 62F. When several messages are transmitted for the same statement period, all statement messages except the last message must contain field 62M (intermediate closing balance); the last message of the statement period must contain field 62F (final closing balance).

When Unit 'OTH' is used, the unit of the commodity must be defined in field 25.

MT 608 - 8. Field 64: Closing Available Balance

Format

Narrative

On 1 February 1991, Samuel Montagu & Co. Ltd., London, sends its semi-monthly statement of the commodity account it services for Deutsche Bank AG, Frankfurt.

This statement advises that Deutsche Bank's unallocated gold account was:

- debited 10000 fine ounces on 17 January 1991 resulting from an MT 604 with a TRN of F56445677 sent by Deutsche Bank AG, Frankfurt, following a commodity trade with Banca Popolare Dell'Etruria, Arezzo.
- credited 2000 fine ounces on 24 January 1991 as previously advised by an MT 607 with a common reference of CRESZZ3105DEUTFF in field 21 resulting from an MT 600 between the Receiver and Credit Suisse, Zurich.
- debited 10000 fine ounces on 27 January 1991 resulting from an MT 604 with a TRN F65633469 sent by Deutsche Bank AG, Frankfurt, following a commodity trade with Dei Paschi Di Siena, Milan.

MT 620 Commodity Fixed Loan/Deposit Confirmation

Note *The use of this message type requires Message User Group (MUG) registration.*

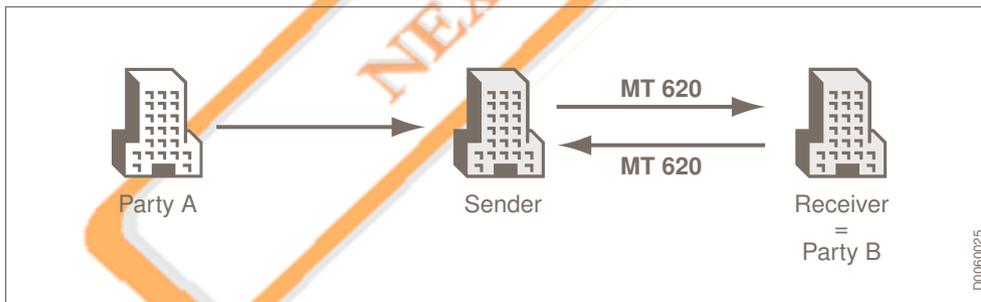

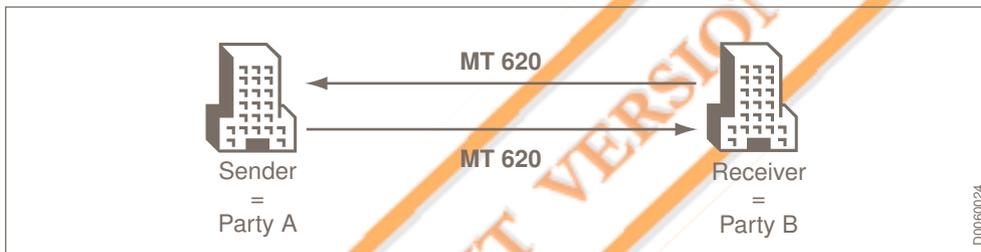

MT 620 Scope

This message is exchanged to confirm a commodity fixed term loan/deposit contract.

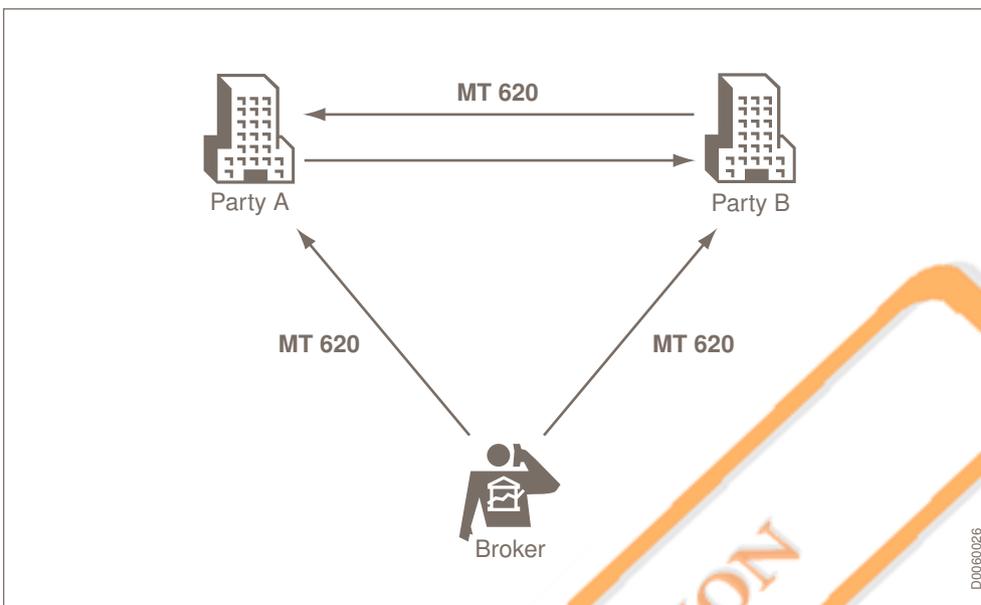

The message is used to confirm/notify the details of:

- a new contract between the parties
- an amendment to a previously agreed contract
- the cancellation of a confirmation
- a rolled over/renewed contract between the parties
- the maturity of a contract.

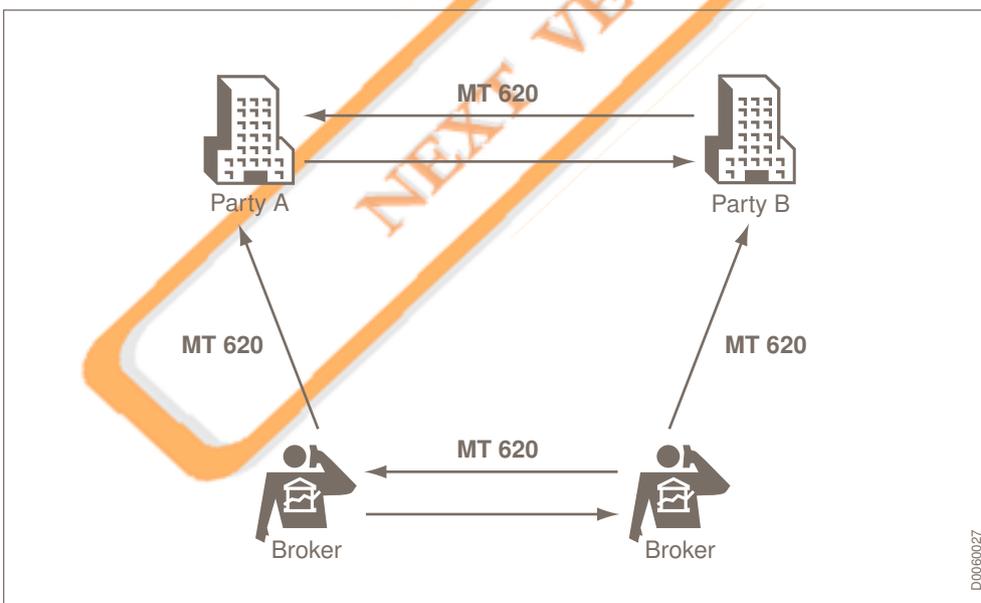

This message is exchanged by or on behalf of the institutions or corporates, party A and party B, who have agreed to a commodity fixed term loan/deposit contract.

A broker may also send this message to the two parties (party A and party B) for which they arranged the deal.

If there are two brokers involved in arranging a deal between party A and party B, this message can also be exchanged between these brokers.

Party A and party B are the legal entities which have agreed to the transaction.

Party A is either:

- the Sender, or
- the institution/corporate on behalf of which the message is sent, or
- one of the institutions for which the broker arranged the deal and to whom it is sending the confirmation, or
- when a broker confirms to another broker, the party for which the sending broker arranged the deal.

Party B is either:

- the Receiver, or
- the institution/corporate on behalf of which the message is received, or
- the other institution for which the broker arranged the deal, that is, party A's counterparty, or
- when a broker confirms to another broker, party A's counterparty.

MT 620 Format Specifications

The MT 620 consists of seven sequences:

- Sequence A General Information contains general information about the fixed loan/deposit as well as about the confirmation itself.
- Sequence B Transaction Details contains information about the transaction.
- Sequence C Settlement Instructions for Amounts Payable by Party A provides the instructions for the amounts payable by party A.
- Sequence D Settlement Instructions for Amounts Payable by Party B provides the instructions for the amounts payable by party B.
- Sequence E Settlement Instructions for Interests Payable by Party A provides the instructions for the interest payable by party A.
- Sequence F Settlement Instructions for Interests Payable by Party B provides the instructions for the interest payable by party B.
- Sequence G Tax Information contains information about the tax regime.
- Sequence H Additional Information provides information, which is not match-critical.

MT 620 Usage Rules

The following guidelines apply when sending/exchanging an MT 620:

- For the actual transfer of funds or the confirmation of credits and debits, other messages outside Category 6 are available, such as the MTs 202, 203, 205, Financial Institution Transfer messages and the MTs 900, 910, 950, Confirmation of Debit/Credit and Statement messages, respectively.

In all cases, the common reference of the MT 620 must be quoted in the relevant reference field, that is, field 21 of the MTs 202, 203, 205.

When an MT 202 covers the deal (for the payment of principal and interests or for the reimbursement of the loan), the party identification fields 56a, 57a and 58a of the MT 620 directly map onto the same fields in the MT 202 with the exception of the account number, as the account number indicated in the party identification fields 56a and 57a of the MT 620 is serviced (not owned) by the party indicated in the same field.

- If the underlying contract is amended/cancelled on a bilateral basis, this should be agreed upon by a bilateral exchange of confirmations with either code AMND or CANC, respectively.
- When cancelling a previously sent message (field 22A is CANC) using MT 620:
 - field 21 must contain the reference (that is, the content of field 20) of the message containing the instruction to be cancelled;
 - the cancellation message must contain a copy of at least the mandatory fields of the original message.
- Sending an MT 620 with code CANC in field 22A, cancels both the underlying contract and the previously sent confirmation message as referred to in field 21 Related Reference.
- To amend a previously sent message (field 22A is AMND):
 - field 21 must contain the reference (that is, the content of field 20) of the previous message;
 - the amendment message must contain both the unchanged and the changed/new fields of the original message;
 - the amendment message replaces the original message.
- The sequence E Settlement Instructions for Interests Payable by Party A should only be used when the instructions in this sequence are different from the instructions in sequence C Settlement Instructions for Amounts Payable by Party A.
- The sequence F Settlement Instructions for Interests Payable by Party B should only be used when the instructions in this sequence are different from the instructions in sequence D Settlement Instructions for Amounts Payable by Party B.
- When a new deal is confirmed, the complete settlement instructions of both parties (sequences C and D) are exchanged and matched. Any further message relative to this deal should repeat those settlement instructions. Payments resulting from a movement will be triggered by the content of field 32a (direction of the transfer) and field 30V (value date).
- The tables below show how the different amount fields involved in the deal can be indicated

Unless specifically mentioned, the presence of the fields mentioned in those tables is mandatory for the different situations described

The conditional rules applying to a specific field are indicated next to that field.

Example of a Deposit

(Party A is the Lender), the table is presented from Party A's point of view, the interest rate is positive.

Fields	New Contract	Rollover No Change	Rollover Increase of Principal	Rollover Decrease of Principal	Maturity
22B	CONF	ROLL	ROLL	ROLL	MATU
17R	L	L	L	L	L
32a	Principal Amount	Principal Amount	New Principal Amount	New Principal Amount	Final Principal Amount
32a (C3) See Note	Not allowed	Amount equals 0	Increase Amount	Decrease Amount preceded by Negative Sign N	Final Principal Amount preceded by Negative Sign N

34a	Next Interest Amount preceded by Negative Sign N	Next Interest Amount preceded by Negative Sign N	Next Interest Amount preceded by Negative Sign N	Next Interest Amount preceded by Negative Sign N	Last Interest Amount preceded by Negative Sign N

Note *The interest amount must be included in field 32a when interest is settled through the same cash flow as the principal.*

Example of a Loan

(Party A is the Borrower), the table is presented from Party A's point of view, the interest rate is positive.

Fields	New Contract	Rollover No Change	Rollover Increase of Principal	Rollover Decrease of Principal	Maturity
22B	CONF	ROLL	ROLL	ROLL	MATU
17R	B	B	B	B	B
32a	Principal Amount	Principal Amount	New Principal Amount	New Principal Amount	Final Principal Amount

34a	Next Interest Amount	Next Interest Amount	Next Interest Amount	Next Interest Amount	Last Interest Amount

Note *The interest amount must be included in field 32a when interest is settled through the same cash flow as the principal.*

MT 620 Guidelines

1. Cancellation of a Message

The MT 692 can also be used for cancellation. The following issues however, have to be considered:

- Acknowledgement: by sending the MT 692, the sender requests the receiver to cancel the confirmation previously sent. The receiver must acknowledge the request by sending an MT 696 back to the sender of the MT 692.
- Routing: the MT 692 might not be routed to the same destination as the MT 620 to be cancelled.
- Repetition of the original message: in the MT 692, only the sender's reference of the previous message is mandatory, all other fields are optional. When an MT 620 with CANC is used, the fields to be copied are mandated by the standard.

2. Settlement Details

The table below shows how the different settlement parties involved in the deal can be identified. **The table is presented from party A's point of view.**

Whenever possible, users should use option A to identify institutions in these fields. Use of free text, that is, option D, except when used to specify recognized codes, is strongly discouraged. Option D not only precludes party B from matching and further processing the message automatically but also is contrary to the message text standards which state that option D is only to be used when no other option is available.

Option J is only used when exchanging messages with fund managers.

Normally, the beneficiary is party A for the amount bought and party B for the amount sold. If party A or party B forwards the funds to an ultimate beneficiary institution, this institution is included in field 58a.

- Party A services account of party B. No separate settlement messages are sent.

Party A will RECEIVE funds from Party B	Party A will PAY funds to Party B
Party A will debit party B's account.	Party A will credit party B's account

- Beneficiary's account serviced by a financial institution other than party A or party B. The payer sends an MT 202 to its correspondent who will then send an MT 205 or equivalent to the correspondent of the payee. The correspondent can be a branch of the party.

- Beneficiary receives the funds through another institution (for example, BANK x for party x).
 The payer sends an MT 202 to its correspondent. The correspondent will then send an MT 205 or equivalent to the correspondent of BANK x, that is, CORR x. CORR x will then send an MT 202 to BANK x who will then send an MT 950 to party x.

Field 56a identifies where BANK x will receive the funds.

- Beneficiary receives the funds through another institution (for example, BANK x for party x), the correspondent of BANK x, CORR x also uses a correspondent.

The payer sends an MT 202 to its correspondent. The correspondent will then send an MT 205 or equivalent to the correspondent of CORR x. The correspondent of CORR x will then send an MT

202 to CORR x. CORR x will then send an MT 202 to BANK x who will then send an MT 950 to party x.

Field 86a identifies where CORR x will receive the funds.

Field 56a identifies the correspondent of BANK x.

MT 620 Field Specifications

MT 620 - 1. Field 15A: New Sequence

Format

Option A Empty field

Presence

Mandatory in mandatory sequence A

Definition

This field specifies the start of mandatory sequence A General Information.

Usage Rules

Only the field tag must be present, the field is empty.

MT 620 - 2. Field 20: Sender's Reference

Format

16x (Reference)

Presence

Mandatory in mandatory sequence A

Definition

This field specifies the reference assigned by the Sender to unambiguously identify the message.

Network Validated Rules

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

Usage Rules

The reference assigned to a message is used for cross-referencing purposes in subsequent messages, such as following confirmation and statement messages as well as queries. It is therefore essential for the identification of the original message sent that the reference be unique.

MT 620 - 3. Field 21: Related Reference

Format

16x (Reference)

Presence

Conditional (see rule C1) in mandatory sequence A

Definition

This field contains the identification of the message to which the current message is related.

Network Validated Rules

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

Usage Rules

When used, this field must contain the Sender's reference (field 20) of the previous confirmation which is to be amended, cancelled, duplicated or the reference of the message to which the rollover or maturity applies.

MT 620 - 4. Field 22A: Type of Operation

Format

Option A 4!c (Function)

Presence

Mandatory (referenced in rule C1) in mandatory sequence A

Definition

This field specifies the function of the message.

Codes

Function must contain one of the following codes (Error code(s): T36):

AMND	Amendment	Replaces a previously sent message with the amended one contained in this message. Used to add settlement agents to an MT 620 previously sent or to correct error(s) in an MT 620 previously sent.
CANC	Cancellation	Cancels a previously sent message. Used to cancel an MT 620 previously sent or to cancel an MT 620 which contains erroneous information.
DUPL	Duplicate	Duplicates an already sent confirmation.
NEWT	New Confirmation	Used to send the MT 620 for the first time or to send a corrected MT 620 when the erroneous one was cancelled using an MT 620 with function CANC.

Usage Rules

As the amend message replaces the previously sent confirmation, it must contain both the amended fields and the fields which are not changed.

When the cancel function is used, the message must reconfirm at least the mandatory fields of the original transaction.

See further guidelines under field 22B, Type of Event.

An amendment or cancellation always refers to the previous confirmation identified in field 21 of this message.

MT 620 - 5. Field 94A: Scope of Operation

Format

Option A 4!c (Scope)

Presence

Optional (referenced in rules C2 and C8) in mandatory sequence A

Definition

This field specifies the role of the Sender and the Receiver of the message in the conclusion of the confirmed trade.

Codes

Scope must contain one of the following codes (Error code(s): T36):

AGNT	Sender/Receiver is sending/receiving the message on behalf of a third party.
BILA	Bilateral confirmation, that is, Sender and Receiver are the principals.
BROK	Confirmation is sent by a broker.

Usage Rules

The absence of this field means that the Sender and the Receiver are the principals.

AGNT is used when the confirmation has been sent or received on behalf of a separate legal party and that party has done the deal.

MT 620 - 6. Field 22B: Type of Event

Format

Option B 4!c (Type)

Presence

Mandatory (referenced in rules C1, C3, C4, and C5) in mandatory sequence A

Definition

This field specifies the event in the life of the loan/deposit.

Codes

Type must contain one of the following codes (Error code(s): T93):

CONF	This is the first confirmation.
MATU	This is a confirmation of the liquidation of a fixed loan/deposit.
ROLL	This is a confirmation of a mutually agreed rollover/renewal with/without change in the principal amount and the interest to be settled or added/subtracted from that amount.

Usage Rules

When the confirmation of a loan/deposit is sent for the first time CONF is used with field 22A = NEWT. To amend or cancel this confirmation CONF is still used and field 22A must contain either AMND or CANC.

When the loan/deposit is renewed (rolled over) for the first time, ROLL is used with field 22A = NEWT. To amend or cancel this rollover ROLL is still used and field 22A must contain either AMND or CANC.

Any subsequent renewal must be confirmed the same way as the first rollover: ROLL is used with field 22A = NEWT. To amend or cancel subsequent rollovers, ROLL is still used and field 22A must contain either AMND or CANC.

When the loan/deposit is reaching its maturity without being rolled over, MATU is used with field 22A = NEWT. To amend or cancel this maturity message, MATU is still used and field 22A must contain either AMND or CANC.

As an overview: the right sequence of using the codes in the life cycle of the deal is:

1. Start of the loan/deposit:

NEWT/CONF (mandatory) followed by: AMND/CONF (optional) or CANC/CONF (optional)

2. Renewal of the loan/deposit (the following is repeated as often as needed during the life of the loan/deposit):

NEWT/ROLL (mandatory) followed by: AMND/ROLL (optional) or CANC/ROLL (optional)

3. Termination of the loan/deposit:

NEWT/MATU (mandatory if maturity function is used) followed by: AMND/MATU (optional) or CANC/MATU (optional)

MT 620 - 7. Field 21N: Contract Number Party A

Format

Option N 16x (Contract Number)

Presence

Conditional (see rule C2) in mandatory sequence A

Definition

This field specifies the contract number of the transaction from party A's viewpoint.

Usage Rules

This field must remain the same throughout the whole life of the transaction. It is used by party A to link the rollover or maturity to the original transaction.

MT 620 - 8. Field 82a: Party A

Format

Option A	[/1!a] [/34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option D	[/1!a] [/34x] 4*35x	(Party Identifier) (Name and Address)
Option J	5*40x	(Party Identification)

Presence

Mandatory in mandatory sequence A

Definition

This field identifies party A.

Codes

In option J, Party Identification must be specified as a list of pairs (Code)(Value) and the following codes and format must be used (Error code(s): T78).

Note that optional codes are surrounded by square brackets ('[' and ']') which are not part of the syntax.

The codes must be placed between slashes ('/').

ABIC	4!a2!a2!c[3!c] or 4! a	Party's Identifier Code or 'UKWN' if Identifier Code not known
[ACCT]	34x	Account number (optional)
[ADD1]	35x	First line of the address (optional)

[ADD2]	35x	Second line of the address (optional)
[CITY]	35x	City, possibly followed by state and country (optional)
[CLRC]	35x	Clearing code (optional)
[GBSC]	6!n	UK domestic sort code (optional)
[LEIC]	18!c2!n	Legal Entity Identifier (optional)
NAME	34x	Party's name
[USCH]	6!n	CHIPS UID (optional)
[USFW]	9!n	FedWire Routing Number (optional)

Network Validated Rules

Identifier Code must be a registered BIC (Error code(s): T27, T28, T29, T45).

Usage Rules

For matching purposes, option A must be used when available.

Party A is either the sender :94A:BILA, or, the institution or corporate on whose behalf the message is sent :94A:AGNT, except when the Sender is a broker :94A:BROK.

When the Sender is a fund manager, the fund manager is specified in this field.

See the chapter Scope for this MT.

MT 620 - 9. Field 87a: Party B

Format

Option A	[/1!a] [/34x] 4!a2!a2!c [3!c]	(Party Identifier) (Identifier Code)
Option D	[/1!a] [/34x] 4*35x	(Party Identifier) (Name and Address)
Option J	5*40x	(Party Identification)

Presence

Mandatory in mandatory sequence A

Definition

This field identifies party B.

Codes

In option J, Party Identification must be specified as a list of pairs (Code)(Value) and the following codes and format must be used (Error code(s): T78).

Note that optional codes are surrounded by square brackets ('[' and ']') which are not part of the syntax.

The codes must be placed between slashes ('/').

ABIC	4!a2!a2!c[3!c] or 4! a	Party's Identifier Code or 'UKWN' if Identifier Code not known
[ACCT]	34x	Account number (optional)

[CLRC]	35x	Clearing code (optional)
[GBSC]	6!n	UK domestic sort code (optional)
[LEIC]	18!c2!n	Legal Entity Identifier (optional)
NAME	34x	Party's name
[USCH]	6!n	CHIPS UID (optional)
[USFW]	9!n	FedWire Routing Number (optional)

Network Validated Rules

Identifier Code must be a registered BIC (Error code(s): T27, T28, T29, T45).

Usage Rules

For matching purposes, option A must be used when available.

Party B is either the receiver :94A:BILA, or, the institution or corporate on whose behalf the message is received :94A:AGNT except when the Receiver is a broker :94A:BROK.

When the Receiver is a fund manager, the fund manager is specified in this field.

See the Scope for this MT.

MT 620 - 10. Field 83a: Fund or Instructing Party

Format

Option A	[/1!a] [/34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option D	[/1!a] [/34x] 4*35x	(Party Identifier) (Name and Address)
Option J	5*40x	(Party Identification)

Presence

Optional in mandatory sequence A

Definition

This field identifies the account information for party A, the underlying fund or instructing institution.

Codes

In option J, Party Identification must be specified as a list of pairs (Code)(Value) and the following codes and format must be used (Error code(s): T78).

Note that optional codes are surrounded by square brackets ('[' and ']') which are not part of the syntax.

The codes must be placed between slashes ('/').

[ABIC]	4!a2!a2!c[3!c] or 4! a	Party's Identifier Code or 'UKWN' if Identifier Code not known (optional)
[ACCT]	34x	Account number (optional)
[ADD1]	35x	First line of the address (optional)
[ADD2]	35x	Second line of the address (optional)
[CITY]	35x	City, possibly followed by state and country (optional)
[CLRC]	35x	Clearing code (optional)
[GBSC]	6!n	UK domestic sort code (optional)
[LEIC]	18!c2!n	Legal Entity Identifier (optional)
NAME	34x	Party's name
[USCH]	6!n	CHIPS UID (optional)
[USFW]	9!n	FedWire Routing Number (optional)

Network Validated Rules

Identifier Code must be a registered BIC (Error code(s): T27, T28, T29, T45).

Usage Rules

When the message is sent or received by a fund manager, this field specifies the fund. The fund manager is specified respectively in either field 82a or field 87a.

For matching purposes, option A must be used when available.

MT 620 - 11. Field 26C: Identification of the Commodity

Format

Option C [3!a]/15x/5!a4!a[4x][//8x]

where subfields of option C are:

Subfield	Format	Name
1	[3!a]	(Delivery Details)
2	/15x	(Delivery Location)

Subfield	Format	Name
3	/5!a	(Allocation)
4	4!a	(Type)
5	[4x]	(Denomination)
6	[//8x]	(Form)

Presence

Mandatory in mandatory sequence A

Definition

This field identifies the commodity bought or sold.

Type identifies the commodity or coin.

Codes

Delivery Details must contain one of the following codes (Error code(s): T35):

- CFR Cost and Freight
- CIF Cost, Insurance, and Freight
- CIP Carriage and Insurance Paid
- CPT Carriage Paid To
- DAF Delivered At Frontier

MT 620 - 12. Field 77D: Terms and Conditions

Format

Option D 6*35x (Narrative)

Presence

Optional in mandatory sequence A

Definition

This field specifies the underlying legal agreement.

Codes

Narrative may contain one of the following codes, placed between slashes ('/').

FIDU	The trade is a fiduciary.
TBIL	The trade is the result of the issuance of a "Sterling Acceptance " or a "Treasury Bill" sent from the borrower to the lender and confirmed by the lender. At maturity, the borrower will pay a pre-arranged amount back to the lender.
WITH	Withholding taxes apply.

Usage Rules

This field may refer to master agreements; it may also refer to local regulations or specific conditions applicable to the trade.

If this field is not present, the deal conforms either to bilateral agreements or to usual banking practices.

The absence of the codes WITH and/or FIDU does not mean that withholding taxes do not apply or that the trade is the result of proprietary trading, it only means that the information is not relevant for the Receiver.

MT 620 - 13. Field 15B: New Sequence

Format

Option B Empty field

Presence

Mandatory in mandatory sequence B

Definition

This field specifies the start of mandatory sequence B Transaction Details.

Usage Rules

Only the field tag must be present, the field is empty.

Definition

This field specifies:

- for a new confirmation (22B=CONF), the value date of the deposit;
- for a rollover (22B=ROLL), the value date of the rollover, that is, the maturity date of the rolled over deposit;
- for a maturity confirmation (22B=MATU), the value date of the original deposit for a non-rolled over deposit or the value date of the previous rollover.

Network Validated Rules

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

MT 620 - 17. Field 30P: Maturity Date

Format

Option P 8!n (Date)

Presence

Mandatory in mandatory sequence B

Definition

This field specifies the latest agreed maturity date, that is, the date on which the principal is to be returned and the interest due.

Network Validated Rules

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

MT 620 - 18. Field 32a: Currency and Principal Amount

Format

Option B 3!a15d (Currency) (Amount)

Option F 3!a15d (Unit) (Amount)

Presence

Mandatory (referenced in rule C9) in mandatory sequence B

Definition

This field specifies the currency and contract amount, that is, the amount on which the interest specified in field 34E is calculated. For a new confirmation (22B=CONF), this amount has to be settled at value date.

Codes

In option F, Unit must contain one of the following codes (Error code(s): T06):

FOZ Fine Troy Ounce

GOZ	Gross Ounce
GRM	Gramme
KLO	Kilo
LIT	Litre
LOT	Lot
OTH	Other
PND	Pound
TAL	Tael
TOL	Tola
TON	Metric Tonne
TOZ	Troy Ounce
UNT	Unit

Network Validated Rules

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

Amount must not contain more than six digits following the decimal comma (Error code(s): C89).

Usage Rules

When Unit 'OTH' is used, the unit of the commodity must be defined in field 72.

MT 620 - 19. Field 32a: Amount to be Settled

Format

Option H	[N]3!a15d	(Sign) (Currency) (Amount)
Option R	[N]3!a15d	(Sign) (Unit) (Amount)

Presence

Conditional (see rule C3, also referenced in rules C3, C4, and C9) in mandatory sequence B

Definition

For a rollover confirmation (22B=ROLL), this field specifies the difference between the previous and the new principal amount, with interest included when interest is settled through the same cash flow.

For a maturity confirmation (22B=MATU), this field specifies the amount with optional interest to be paid by the borrower at maturity date.

Codes

In option R, Unit must contain one of the following codes (Error code(s): T06):

FOZ	Fine Troy Ounce
GOZ	Gross Ounce
GRM	Gramme
KLO	Kilo
LIT	Litre
LOT	Lot
OTH	Other
PND	Pound
TAL	Tael
TOL	Tola
TON	Metric Tonne
TOZ	Troy Ounce
UNT	Unit

Network Validated Rules

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

Amount must not contain more than six digits following the decimal comma (Error code(s): C89).

If Amount is zero, Sign must not be present (Error code(s): T14).

Usage Rules

If Amount is positive (Sign is not present), the amount is to be paid by party A; if Amount is negative (Sign is present), the amount is to be received by party A.

For a rollover with no change in principal, Amount is zero and Currency is the currency of the loan/deposit.

For a rollover, when interest is settled separately or compounded, it is not indicated in the rollover confirmation.

For a maturity confirmation, if both the principal and the interest are paid to the same financial institution (sequences E and F are not present) field 32a (Currency and Principal Amount) contains the sum of the principal and the interest to be settled.

If interest is paid to another financial institution (sequence E or F is present), field 32a (Currency and Principal Amount) contains only the principal to be repaid.

When Unit 'OTH' is used, the unit of the commodity must be defined in field 72.

MT 620 - 20. Field 30X: Next Interest Due Date

Format

Option X 8!n (Date)

Presence

Conditional (see rule C3) in mandatory sequence B

Definition

This field specifies the date the next interest is due.

Network Validated Rules

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

MT 620 - 21. Field 34a: Currency and Interest Amount

Format

Option E [N] 3!a15d (Sign) (Currency) (Amount)

Option J [N] 3!a15d (Sign) (Unit) (Amount)

Presence

Mandatory in mandatory sequence B

Definition

This field specifies:

- for a new confirmation (22B=CONF), the first interest amount
- for a rollover confirmation (22B=ROLL), the next interest amount
- for a maturity confirmation (22B=MATU), the final interest amount to be settled at maturity

Codes

In option J, Unit must contain one of the following codes (Error code(s): T06):

FOZ	Fine Troy Ounce
GOZ	Gross Ounce
GRM	Gramme
KLO	Kilo
LIT	Litre
LOT	Lot
OTH	Other

PND	Pound
TAL	Tael
TOL	Tola
TON	Metric Tonne
TOZ	Troy Ounce
UNT	Unit

Network Validated Rules

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

Amount must not contain more than six digits following the decimal comma (Error code(s): C89).

If Amount is zero, Sign must not be present (Error code(s): T14).

Usage Rules

If the interest amount has to be paid by Party A, Sign must not be present; if the interest amount has to be received by Party A, Amount is negative and Sign must be present.

For a maturity confirmation, this amount is settled separately only when the principal and the interests are paid to a different financial institution (sequence E or F is present).

MT 620 - 22. Field 37G: Interest Rate

Format

Option G [N]12d (Sign) (Rate)

Presence

Mandatory in mandatory sequence B

Definition

This field specifies the interest rate.

Network Validated Rules

The integer part of Rate must contain at least one digit. A decimal comma is mandatory and is included in the maximum length (Error code(s): T40, T43).

Sign must not be used when Rate is equal to '0' (Error code(s): T14).

Usage Rules

Sign must not be present for a positive rate.

Sign must be present for a negative rate.

A negative rate is used in the extremely rare cases where the agreed rate is negative, the sign of the rate is independent from the direction of the deal (Loan or Deposit).

The interest rate must be specified in any confirmation even when there is no change in the rate.

MT 620 - 23. Field 14D: Day Count Fraction

Format

Option D 7x

Presence

Mandatory in mandatory sequence B

Definition

This field specifies the number of days which are taken into account for the calculation of the interest.

This field specifies the Day Count Fraction as per ISDA definitions.

Codes

One of the following codes must be used (Error code(s): T36):

30E/360	30E/360 or Eurobond Basis
360/360	30/360, 360/360 or Bond Basis
ACT/360	Actual/360 (28-31/360)
ACT/365	Actual/365 or Actual/Actual (28-31/365-6)
AFI/365	Actual/365 (fixed) (28-31/365)

Example

February 2004:

ACT/360	29/360.
ACT/365	29/365.
AFI/365	29/365.

MT 620 - 24. Field 30F: Last Day of the First Interest Period

Format

Option F 8!n (Date)

Presence

Conditional (see rule C5, also referenced in rules C5 and C6) in mandatory sequence B

Definition

This field specifies the last day of the first/next interest period.

Network Validated Rules

Date must be a valid date expressed as YYYYMMDD (Error code(s): T50).

Usage Rules

This field should only be used when there is at least one interest payment before maturity.

In the first confirmation of a loan/deposit, this field contains the date of the first interest payment while in a rollover confirmation, this field specifies the next interest payment date. The interest period is specified in field 38J.

MT 620 - 25. Field 38J: Number of Days

Format

Option J 1!a3!n (Indicator) (Number)

Presence

Conditional (see rule C6) in mandatory sequence B

Definition

This field specifies the number of days or months between interest payments starting from the date specified in field 30F.

Codes

Indicator must contain one of the following codes (Error code(s): T61):

D	Days
M	Months

MT 620 - 26. Field 15C: New Sequence

Format

Option C Empty field

Presence

Mandatory in mandatory sequence C

Definition

This field specifies the start of mandatory sequence C Settlement Instructions for Amounts Payable by Party A.

Usage Rules

Only the field tag must be present, the field is empty.

MT 620 - 27. Field 53a: Delivery Agent

Format

Option A	[/1!a] [/34x] 4!a2!a2!c[3!c]	(Party Identifier) (Identifier Code)
Option D	[/1!a] [/34x] 4*35x	(Party Identifier) (Name and Address)
Option J	5*40x	(Party Identification)

Presence

Optional in mandatory sequence C

Definition

This field identifies the financial institution from which party A will transfer the funds.

Codes

In option J, Party Identification must be specified as a list of pairs (Code)(Value) and the following codes and format must be used (Error code(s): T78).

Note that optional codes are surrounded by square brackets ('[' and ']') which are not part of the syntax.

The codes must be placed between slashes ('/').

ABIC	4!a2!a2!c[3!c] or 4! a	Party's Identifier Code or 'UKWN' if Identifier Code not known
[ACCT]	34x	Account number (optional)
[ADD1]	35x	First line of the address (optional)
[ADD2]	35x	Second line of the address (optional)

Network Validated Rules

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

MT 620 - 62. Field 26H: Counterparty's Reference

Format

Option H 16x

Presence

Optional in conditional (see rule C10) sequence H

Definition

This field specifies the counterparty's reference, if known.

MT 620 - 63. Field 21G: Broker's Reference

Format

Option G 16x

Presence

Optional in conditional (see rule C10) sequence H

Definition

This field specifies the broker's reference of the trade.

Network Validated Rules

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

MT 620 - 64. Field 22Z: Underlying Product Identifier

Format

Option Z 6a (Product Identifier)

Presence

information] or
or (Code) (Narrative)
[/8c/[additional information]]

Presence

Optional in conditional (see rule C10) sequence H

Definition

This field specifies additional information for the Receiver and applies to the whole message.

Codes

One of the following codes may be used in Code:

BROKER	Identification of the broker negotiating the contract on behalf of one of the parties.
ELEC	Indicates that the deal has been arranged via an electronic means. The code can be followed by an indication of the specific electronic means used for arranging the deal.
INTERMDY	Specifies the intermediary institution for the settlement of the commodity.
PHON	The deal was arranged by telephone.
TELEX	The deal was arranged by telex.
TIME	The time at which the transaction was concluded.
VENU	The venue where the transaction was executed.

Usage Rules

Only bilaterally agreed codes can be used in this field.

Each code used must be put between slashes and appear at the beginning of a line.

All alphabetic characters in a code must be in upper case.

Additional explanatory information, which may be continued on the next lines, is preceded by a double slash '//'. Narrative text that is not qualified by a code must start with a double slash '/' on a new line, and should preferably be the last information in this field.

Field 72 must not be used for information for which another field is intended.

The use of this field with unstructured text may require manual intervention and thus cause delay in automated systems.

If the time of the transaction requires to be specified, the code /TIME/ must be used, followed by the time at which the transaction was executed.

If the venue where the transaction was executed has to be reported, the code /VENU/ must be used followed by the Market Identifier Code, MIC (ISO 10383) which is used to identify exchanges and Multilateral Trading Facilities (MTF), or the XOFF code.
