Guiding questions:

- Can an interconnectedness of ecology, economy and social equality be worked on this topic? Yes, it can.
- What dilemma situations or different perspectives can be illustrated by the topic? Different qualities. What do you prefer to offer, to produce or to sell: More amount or more quality?
- Does the structure of the topic offer interdisciplinary, self-directed processing? It depend.
- How can learner emotions be brought in and considered at the beginning and throughout the learning setting? Asking them if they know about the different varieties of olive oil and their positive and negative attributes
- What opportunities does the topic offer for learner empowerment?
In my opinion, one of the best opportunity for empowerment, is to improve the quality of our product or service, thereby we will feel selfconfident and pround of a good work and make difference with other people.

Retrospective lesson analysis

- Is an evaluation of the Teaching - Training Setting planned? Yes, it is

- How can the experiences I have made improve my teaching?
I should show a third olive oil sample, with a lower quality for teaching typical defects in a common olive oil.
